

**ESB 5127-Jobs Now Act Section 313-Chehalis River Basin Flood Relief Projects
Review and Approval Form**

(Prepared for Flood Authority Action on 8/30/2012)

Proposed Project: Market Street Dike (Preliminary Engineering Design, Costing Stage).

Lead Agency: City of Aberdeen.

Budget: In the event cost-savings are realized as a result of combining Grays Harbor County or City of Aberdeen project design activities into single procurements, those savings should be passed along for next stage design needs of the Market Street Dike project (provided those savings can be meaningfully applied). Proposed project budget is approximately \$113,000.

Description: High water from the Wishkah River overtops the river bank in the Market Street area. The proposed project would raise the roadway and adjacent sidewalk from South E Street to East 1st Street and create a small dike to reduce flood frequency. The proposed project is listed in the City of Aberdeen's Public Works Master Project List (January 2011) and would be located on public road right of way. Need is for preliminary engineering design, costing. See project location at <http://goo.gl/maps/P9RBc>.

Flood Hazard Reduction Benefits: The dike/levee project prevents flood waters from entering important commercial areas and properties within the city limits of Aberdeen.

Adverse Impacts/Effects: Since water levels in the area are largely tidally influenced, the loss of floodplain storage due to these projects is considered negligible.

Project Feasibility: The scope and scale of the proposed project does not at this time appear to raise any significant issues that would likely preclude the project from moving forward.

Timeline: Identified next stage design work will begin for the proposed project soon after receipt of Jobs Now Act funding.

Authority: ESB5127, §313(2).

Jobs Supported: 0.4 FTE (for this stage, if funded).

Studies Completed: Unknown.

Further Studies Needed: Studies and documentation necessary to support permitting and environmental review.

Current Project Status: Waiting for funding.

By signing this review and approval form, we hereby agree to the following:

- We have received information from the project proponent and had the opportunity to ask questions or seek additional information.
- We understand that the proposed project fits the authorization allowed under ESB 5127, and will help provide or lead to a project to provide flooding relief within the Chehalis Basin while also providing jobs.
- We recommend that OFM allot funds to the project proponent.
