Hello Walla Walla Water 2050 workgroup,

Thank you for your interest in developing a 30-year plan for the Walla Walla Basin. The October 3 – 4 strategic planning kickoff was a success! Please visit the WWW 2050 webpage for new information, and watch this excellent video to get a sense of the motivations backing this effort.

We now need to maintain our momentum by identifying and scheduling the immediate next steps:

- If you have not already done so, please sign up to be considered for the Executive Committee. Participation in the Executive Committee will require a high level of commitment and will likely include meetings once or twice a month. Selected members will be tasked with objectively representing the diverse stakeholders and visions for the basin. Please consider these expectations when deciding if you would like to be considered for the Executive Committee.

- Please join the WA Department of Ecology, the Walla Walla Watershed Management Partnership, and the Confederated Tribes of the Umatilla Indian Reservation for a meeting to begin selection of a final Executive Committee that will take place Nov. 15 at the Walla Walla Community College. Additional meeting details will be sent out soon.

We will continue to keep you informed as this process moves forward, both via this listserv and at http://ecology.wa.gov/wallawalla2050. Please forward this email to others who may be interested.

Thank you for your time and commitment to the Walla Walla River Basin,

Tom Tebb, Mary Verner, and Brook Beeler
WA Department of Ecology Executive Leadership
