

# COMMUNITY CONVERSATIONS

## Abbreviated / Amended Report for CITY OF DAYTON

*If you want to go fast, go alone.  
If you want to go far, go together.*

-African proverb

The purpose of Community Conversations is to identify priorities that can help improve the quality of life in our region, which includes Columbia and Walla Walla counties and northeastern Umatilla County. Community Council is leading this project in collaboration with United Way of Walla Walla County, Sherwood Trust, Blue Mountain Community Foundation, and Pomegranate Center.

This report is a compilation of the results from many different community workshops and gatherings, and some existing visions and initiatives.

Our goal was to engage as many residents of our region as possible. In an attempt to be as inclusive as possible, the workshops were held across the region, mostly in the evening, with one held during the day. Refreshments, childcare, and simultaneous Spanish translation were offered at all of the workshops. In addition to the large workshops, United Way of Walla Walla County conducted many smaller roundtable discussions at business offices, service club meetings, and youth centers. In all, over 800 participants offered their ideas for the future.

### A. Community Conversations Workshops:

... The facilitator asked each attendee to come up with an answer to this question:

**What ideas do you have for this region's future?** Then they asked participants to share their top idea. Everyone had a chance to speak, presenting their best idea in a few key words.

Pomegranate Center uses this sharing strategy because they believe that it is as important to express ideas as to hear them from others. When it comes to community, together we know more and through witnessing everyone else's proposals, we begin to see larger patterns and themes. At the end of the meetings, the facilitator asked attendees to identify common themes as the first step in linking their ideas with those of others.

## **B. Current Visioning Documents**

In order to recognize additional recent visioning activities that took place outside of these workshops and roundtable discussions, we have included ideas from visions and initiatives that were submitted to us. These include *(Abbreviated for Dayton)*:

- *Blue Mountain Action Council Community Needs Assessment 2015*
- *Columbia County Coalition for Youth and Families Strategic Plan 2016*
- *Columbia Country Comprehensive Economic Development Strategies List 2016*

## **GENERAL TOPIC AREAS** *(5 Top Topics identified at the Dayton workshop in September are underlined and in **BOLD BLUE**)*

Ideas from all of the workshops, roundtable discussions, and visioning documents, have been grouped into thirteen general topic areas, which are described below. Following the list of general topic areas is the list of specific ideas under the general topic area heading.

1. **ACCESS TO EDUCATION** - *The region will be renowned for excellence in education that embraces the entire population from birth through retirement.*
2. **ARTS AND CULTURE** - *The region will become a thriving arts community for all ages, and arts education will flourish.*
3. **CARE FOR NATURE** - *The region's abundant natural treasures and environmental resources will be sustainably managed, protected and celebrated.*
4. **CIVIC ENGAGEMENT** - *The region's government will reflect its diverse community and planning efforts will be socially inclusive. This will be a community with a culture of civic engagement that provides multiple opportunities for civic involvement, particularly among youth.*
5. **COMMITMENT TO DIVERSITY** - *The region will celebrate its rich social and cultural diversity by being inclusive and respectful of, and caring for, people from all backgrounds.*
6. **HEALTH** - *People of all ages will be able to access a full range of health services. Healthy lifestyles will be supported by access to healthy food, regional trail networks and recreational facilities.*
7. **LOCAL AGRICULTURE** - *The region will preserve farmlands and will support a robust local food system that will contribute to the population's health and the region's vitality.*
8. **RECREATION** - *Bike/walking paths will provide greater access to the region's natural and cultural amenities, and will increase regional connectivity. Sport complexes and recreational facilities, especially for youth, will be expanded.*
9. **REGIONAL COLLABORATION** - *The region will foster collaboration among governments, businesses and non-profits at the neighborhood, local, regional and state levels. Infrastructure will enhance connectivity within the region and to destinations outside the region.*
10. **SAFETY** - *Community members and law enforcement will work together to cultivate safe environments for everyone, particularly in public spaces, on roadways, and in the region's schools.*
11. **STRONG AND DIVERSE ECONOMY** - *The region will have a strong economy that supports a large base of family-wage jobs in multiple sectors. The region will foster business creation and innovation, and will provide more employment opportunities for teens and youth. New opportunities to connect food production to tourism will build on the existing rich agricultural base.*

**12. VIBRANT CENTERS** - *Cities and towns will be places where people can live, work and play. Housing will be affordable and a vibrant mix of commercial establishments will serve a diverse population. Building on existing historical fabric, cities and towns will become more environmentally sustainable, with greater emphasis on walkability, public transit, green energy, and public spaces.*

**13. WELLBEING FOR ALL**

*The region will provide services and opportunities for all, creating a place that is attractive to young families and retirees alike. A broad array of recreational and cultural activities along with affordable childcare, year-round opportunities for youth, and a support system for seniors and the disabled will serve the whole population and create a high quality of life for everyone.*
