

RWCC

Regional Wastewater Coordinating Committee

To: City of Raymond Mayor and Council
CC: City of South Bend Mayor and Council
From: Chairman, RWCC
Date: 4/12/2013
Re: Selection of Engineering firm.

The Regional Wastewater Coordinating Committee has reviewed the Statements of Qualifications from the five firms that submitted. At the July 17th meeting of the RWCC, the Committee voted unanimously to recommend the engineering firm of Gray & Osborne for design and construction of the proposed Regional Wastewater Facilities, based on the following facts:

- They are familiar with the project, the project background, the TMDL associated with the receiving waters, and the wastewater characteristics of both cities.
- They completed the Regional General Sewer Plan and Wastewater Facilities Plan for both South Bend and Raymond.
- Each individual member of the RWCC ranked this firm as the first choice.
- They were also recommended by wastewater operational staff.

The RWCC does hereby recommend that the City of Raymond {Lead City} select Gray & Osborne as the contract consultant for the design of the Regional Wastewater Facilities.
