Fry Creek Restoration & Flood Reduction

City of Aberdeen

Project Partner:

- City of Hoquiam

Funding:

- Chehalis River Basin Flood Authority
- Washington Coast Restoration Initiative

Design Team:

- Maul, Foster, & Alongi
- Forterra
- KPFF Consulting Engineers
- Watershed Science & Engineering

TimberWorks Master Plan

Focus Area 3: Fry Creek

Project		Cost
3-1	**Land Conservation in Upper Watershed**	**MED**
3-2	**Fry Creek Restoration and Flood Reduction**	**MED**
3-3	**West End Play Field** Flood control feature	**MED**

The Goals

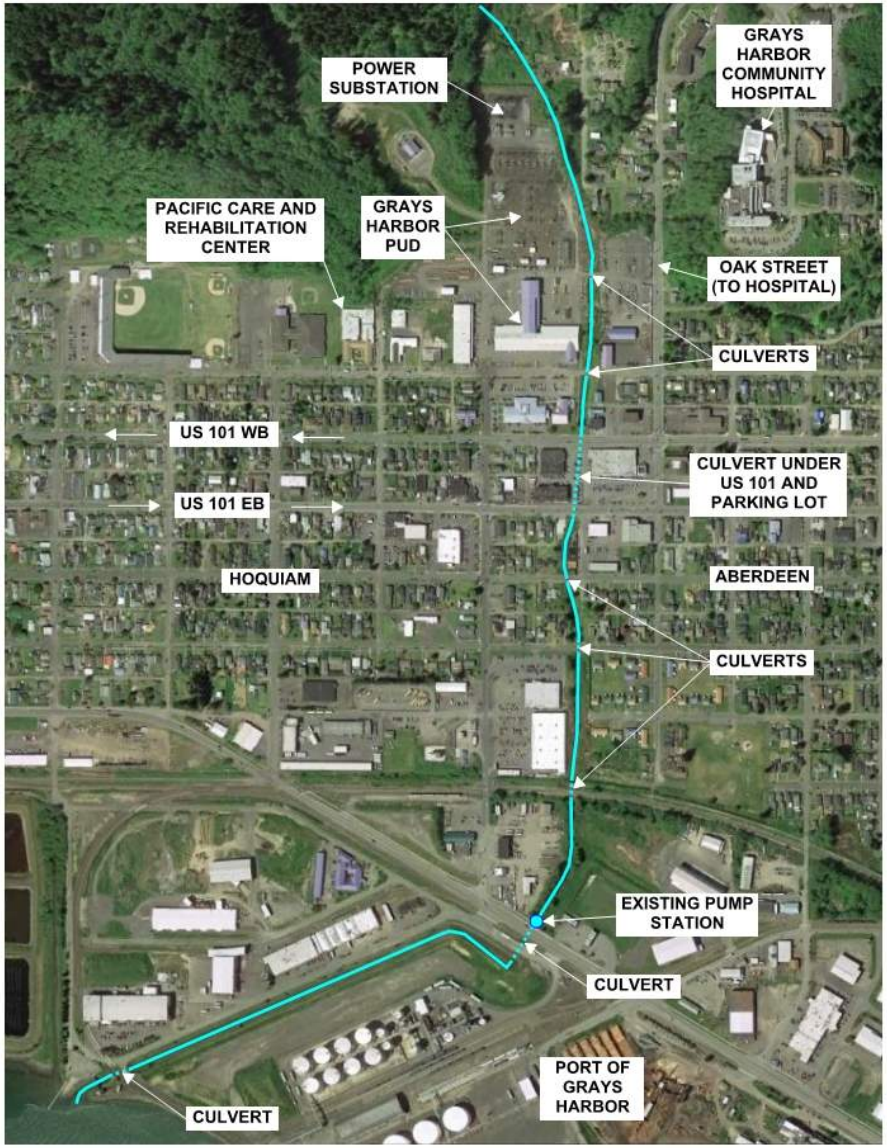
- Reduce flooding
- Restore habitat
- Improve public open space

Fry Creek Project History

• Early 2016	Identified in the early stages of the TimberWorks Master Plan
• 4/2016	Awarded $150K by Flood Authority for design
• 5/2016	Applied for WCRI funding
• 9/2016	Ranked by WCRI for 2017-2019 funding
• 10/2016	Awarded additional $350K by Flood Authority for design
• 12/2016	Surveying and design began
• 8/2017	Prelim design report complete, first phase identified
• 12/2017	Final design of first phase underway, $2.215 million in WCRI funding available pending passage of a capital budget

Fry Creek Corridor

- Urban environment
- Constricted channel
- Culvert constrictions
- Degraded habitat



Fry Creek Issues: Constricted channel, culvert constrictions, degraded habitat

FRY CREEK - CONSTRICTED CHANNEL

FRY CREEK - CULVERT CONSTRICTIONS

FRY CREEK - CULVERT CONSTRICTIONS

FRY CREEK - CONSTRICTED CHANNEL

FRY CREEK - CULVERT CONSTRICTIONS

FRY CREEK - CULVERT CONSTRICTIONS

Design Process

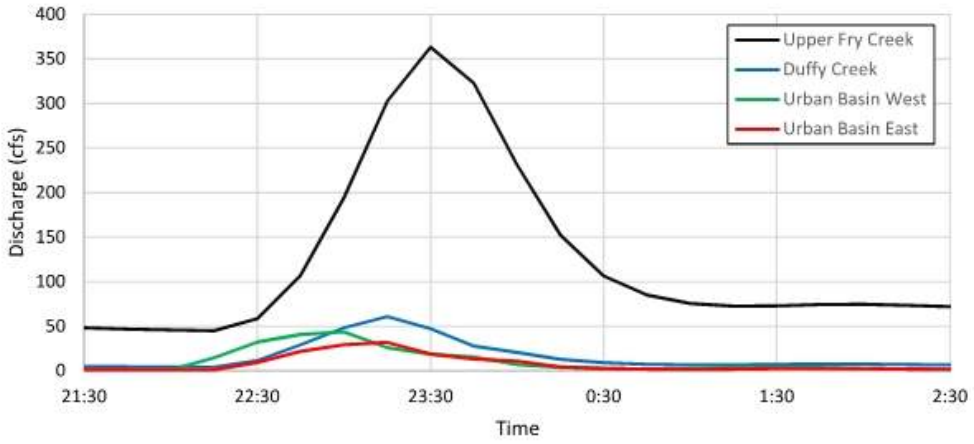
1. Surveying & Modeling
2. Advisory Committee & Public Outreach
3. Identification of Options, Preliminary Design, & Phasing Decision
4. Final Design
5. Construct First Phase
6. Construct Future Phases

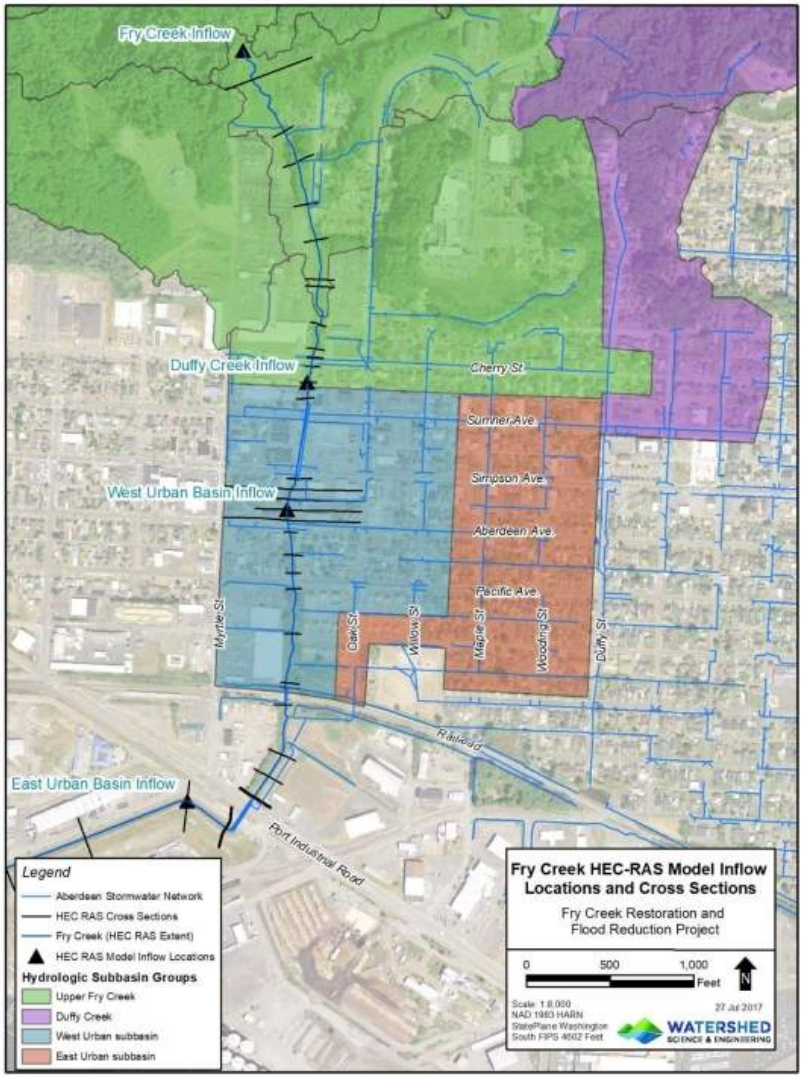
Design Process

1. Surveying & Modeling
2. Advisory Committee & Public Outreach
3. Identification of Options, Preliminary Design, & Phasing Decision
4. Final Design ← **We are here.**
5. Construct First Phase
6. Construct Future Phases

1. Surveying & Modeling

Subbasin Group	2- year Discharge (cfs)	10- year Discharge (cfs)	25- year Discharge (cfs)	100- year Discharge (cfs)	500- year Discharge (cfs)
Upper Fry Creek	151	250	297	363	439
Duffy Creek	31	48	56	67	78
Urban Basin West	32	44	49	56	62
Urban Basin East	22	31	35	40	45





1. Surveying & Modeling

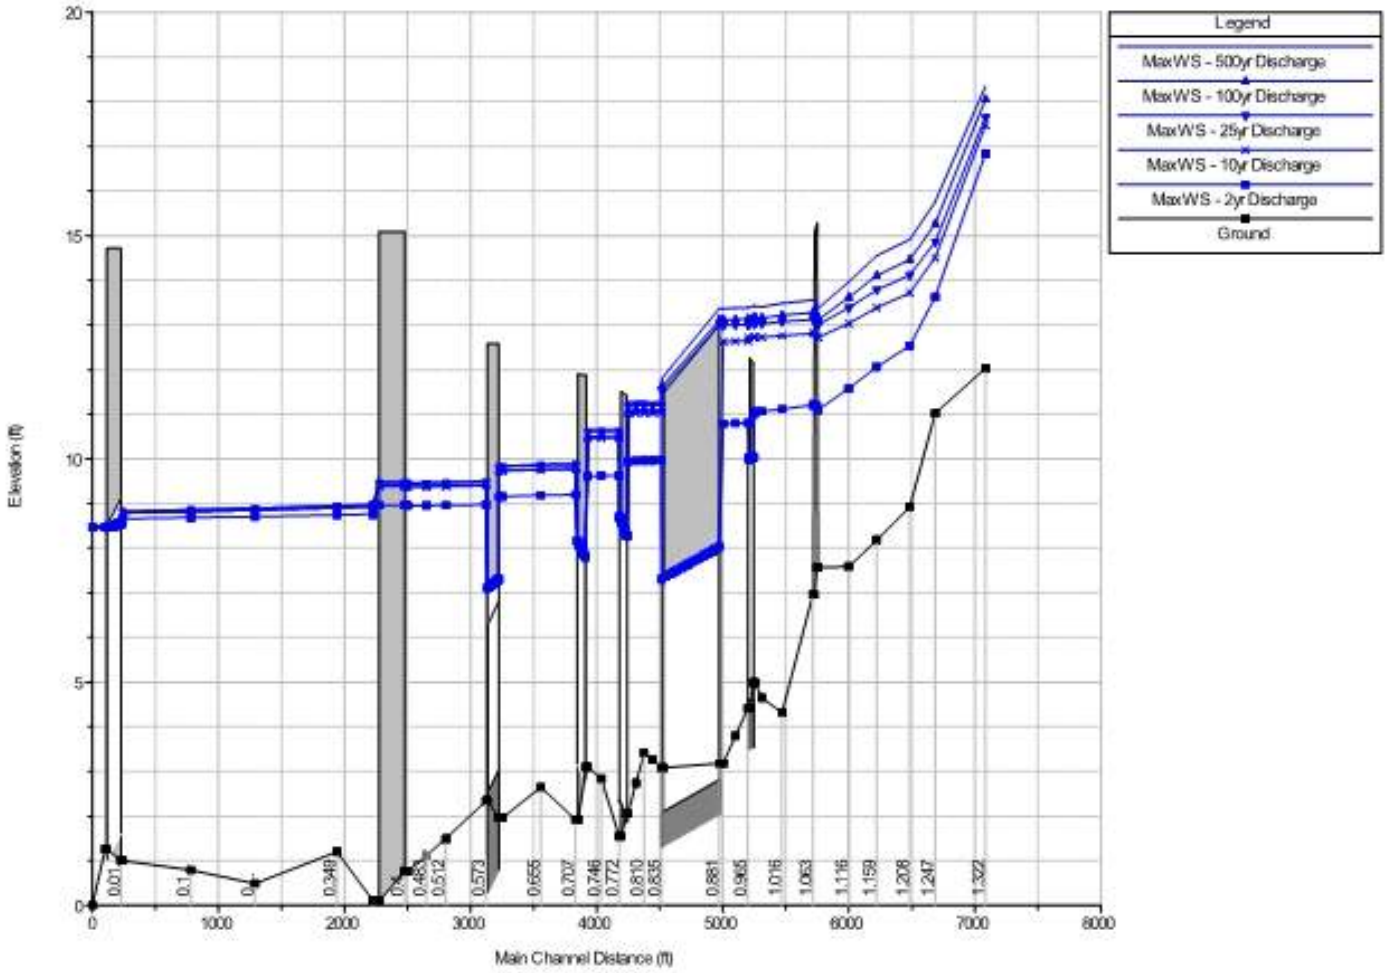


Figure 6. Maximum modeled water surface elevations for 2-, 10-, 25-, 100-, and 500-year discharge in Fry Creek. The tidal boundary condition used for all runs was mean higher high water (MHHW).

2. Stakeholder & Public Outreach

- Advisory Committee
  - Grays Harbor PUD
  - WDFW
  - Grays Harbor College Fisheries
  - Grays Harbor Conservation District
  - Property Owner Kathi Hoder
  - Port of Grays Harbor
- 4/2017 – Initial advisory committee meeting & public open house
- 7/2017 – Follow-up advisory committee meeting & public open house

Community members discuss flooding issues at open house.

3. Identification of Options, Preliminary Design, & Phasing Decision

NOTES:

Shaded cells indicate the portion of the Fry Creek channel where improvements have been included in that model.

NAVD = National Geodetic Vertical Datum 1983.

3. Identification of Options, Preliminary Design, & Phasing Decision

BEST OPTION TO:

1. SIGNIFICANTLY REDUCE FLOODING
2. IMPROVE HABITAT
3. IMPROVE PUBLIC SPACE
