

LOWER SATSOP RIVER

Lower Satsop River Restoration and Protection Project
Phase IA, IB, and IC

Presentation to Grays Harbor County Commissioners
10:30 to 11:00 a.m.
3-19-2019

Background: Context

- Lower Satsop River is a dynamic system where river bank erosion, channel migration, and flooding are seriously impacting adjacent properties.
- Flood hazard reduction projects have been proposed and evaluated in recent years without lasting success.
- Inaction and frustration characterize the feeling of many community members.

Background: Funding (2012-18)

WHAT	WHEN	FLOOD	HABITAT	FLOOD & HABITAT
Flood Authority funding to GHC for WSE riprap removal study	2012-13	\$50,000 (a)		
Flood Authority funding to WDFW to design restoration project	2014-19		\$450,000 (a)	
CBS funding to WDFW to design restoration project	2014-19		\$235,860 (b)	
Ecology funding to WDFW to construct relic channel opening project	2016-18	\$50,000 (c) (\$50,000) (c)		
WCRI funding to WDFW for restoration project (Phase I Construction will remove spoils, fill ponds, conduct amphibian/fish surveys, revegetate site)	2018-20		\$1,030,000 (d)	
Flood Authority to GHC to develop Satsop Investment Plan	2018-19			\$40,000 (e)
Flood Authority to GHCD for local landowner engagement	2018-19			\$22,500 (f)
Flood Authority to GHC to develop Satsop Investment Plan	2018-19			\$15,000 (e)
TOTAL →		\$50,000	\$1,715,860	\$77,500

(b) RCO [15-1459](#)

(c) RCO [16-2182](#) (permitting challenges precluded completion of project)

(d) RCO [18-1195](#) (phase II construction will remove soils, remove dikes around ponds for full floodplain connectivity, remove some riprap and will be funded by 2019-21 WCRI grant of \$1,429,159 -- RCO [18-2142](#))

(e) RCO [18-2118](#)

(f) RCO [18-2140](#)

Lower Satsop Investment Plan

- GHC initiated and led a multi-entity advisory/community planning process (4/2018 to present).

<https://www.ezview.wa.gov/site/alias/1973/37259/lower-satsop-planning-process.aspx>

Essential Infrastructure – Threats/Consequences

Satsop Business Park Water Well

- Located upstream of confluence of Satsop and Chehalis rivers.
- Well threatened by erosion (rock armoring beginning to fail).
- Satsop Business Park is substantial employment center.
 - 400+ people directly employed by businesses
 - Draws from Montesano, Aberdeen, Hoquiam

Keys Road

- Main route to Satsop Business Park (400+ jobs).
- Preferred route from Montesano, Aberdeen and Hoquiam.
- 20% of average daily traffic is truck traffic.
- Remaining life of Keys Road bridge is 30-40 years (making near-term replacement impractical).

Monte-Elma Bridge

- Erosion, scour issues threaten bridge, footings requiring more frequent corrective action.

Port of Grays Harbor (Marine)

- 43.8% of Chehalis sediment load is reportedly attributable to Satsop (pg. 105 [here](#)).

2018 (Nov 27th)

Farmland – Threats/Consequences

Satsop Farm Land

- Very high quality soil
- 11/27/2018 avulsion:
 - Farm soil lost = 239K cu/yards (23,917 dump trucks)
 - Farm and riparian soil lost = 538K cu/yards (53,833 dump trucks)
- Westward migration of river continues to erode and wash away irreplaceable farmland
- Beyond direct crop value, farm soils are also valuable for bird migration/overwintering, bird hunting/watching, aquifer recharge, open space.

Funding 2019 (“FLOOD”)

INVESTMENT (Immediate)	ACTION	COST	STATUS
Phase IA: Develop Comprehensive Reach-scale Preliminary Design	March/April/May/June 2019	\$175K	Funded by Chehalis Basin Board (2-07-2019)
Phase IB: Complete Final Design/Engineering/Permitting	July 2019	\$150K	Rep. Brian Blake has submitted funding request (see here)
Phase IC: Construction	July/Aug/Sept/October 2019	\$1.25M	Rep. Brian Blake has submitted funding request (see here)
