<p>Note: Attendees logged into the webinar from 31 unique sites. At many sites, multiple people viewed the webinar. If the average number of attendees per site was two or three, the total number of attendees could easily have been in the 60-90 range. Some sites had 5-10 people viewing as a lunch time training, so the total could be higher but there is no way to be sure.</p>				International Boundary and Water Commission
