

Chehalis River Basin

*Reducing Flood Damage and
Restoring Aquatic Species*

9:00 a.m.

October 5, 2018

Thurston Regional Planning Council

Today's Presentation . . .

- Provide update, encourage discussion.

- Key messages . . .

1. **Broad agreement** -- For first time in a century there is progress across the Basin on next steps to reduce flood damage and enhance salmon, aquatic species.

2. **Basin-wide strategy** -- An action-oriented, multi-phased Basin-wide strategy is needed to protect communities along the river and to enhance aquatic species.

3. **Collaboration is key** -- WA Legislature, Governor's Office, Governor's Chehalis Basin Work Group, Chehalis River Basin Flood Authority, and WA Agencies all working together = Action!

4. **Fundamental principle** -- Solving one's problems doesn't increase another's.

Action . . .

October 2018

"Chehalis River Basin Flood Authority"

- **Formed in 2008**

- **Formal body focused on:** (1) flood hazard mitigation throughout the Basin; and (2) decision-making that is . . .
 - informed by science.
 - protective of Basin residents/communities.
 - environmentally appropriate.

- **Basin jurisdictions represented**

Building on the success of the earlier Chehalis Basin Work Group, the 2016 Washington Legislature created a new Office of Chehalis Basin within Ecology to administer legislative funding to implement the Chehalis Basin Strategy. In April 2018, Director Maia Bellon selected [Andrea McNamara Doyle](#) to lead our newest office.

When the Legislature formed the Office of Chehalis Basin, lawmakers also established the Chehalis Basin Board to provide long-term oversight of the strategy. The Board is responsible for developing budget recommendations to the Governor's office to implement the strategy. Our Office of Chehalis Basin provides support to the board.

The seven-member board typically meets the third Thursday of every month. Members represent the Chehalis River Basin Flood Authority, Confederated Tribes of the Chehalis Reservation, and Quinault Indian Nation, as well as agricultural, environmental, and economic interests in the basin. There are also five non-voting Board members representing various state agencies. Meeting agendas and materials as well as Board members and their contact information is available on the [Chehalis Basin Board's EZ View website](#).

Chehalis Basin Board Meetings

UPDATE - The Oct. 4, 2018, special meeting of the Chehalis Basin Board that was to take place in Aberdeen has been **cancelled**. All board agendas and meeting materials are available through [EZ View](#).

Chehalis Basin Strategy: Reducing Flood Damage and Restoring Aquatic Species

For the first time—after over a century of catastrophic floods and hundreds of studies—Inland agreement is building on a comprehensive strategy to reduce flood damage, restore salmon populations, and support the prosperity of communities in the Chehalis Basin.

The problems in the Chehalis Basin are real and action is being taken now to protect communities and restore aquatic species.

Frequent Floods Are Getting Worse and Damage is Increasing. The five largest floods in the Chehalis Basin's history were caused by big, wet and cold storms, causing unprecedented damage to homes, property, businesses, public facilities, roads, and bridges. Each of the worst floods struck in the days of a large charge outside from the thousands of acres of wetlands and floodplains. These floods have caused the most damage, and caused several hundred million dollars in damage. The cost of future floods will be over \$10 billion in the next 50 years if we do not act.

Salmon Populations Are Seriously Degraded and Continue to Decline. The natural resources of the Chehalis Basin have suffered because of the loss of riparian habitat and the loss of spawning habitat. The Chehalis Basin supports the world's largest population of steelhead trout, but the steelhead population has declined by 90% since 1980. The steelhead population is degraded, with salmon populations at 15% of their historic levels. It is very possible that the current trajectory, coupled with the potential impacts of climate change, would lead to the extinction of steelhead trout and other salmonids in the basin.

Changing the History of Inaction. For a long time, there has been a failure to meaningfully address the real problems of catastrophic flooding and significant degraded riparian habitat in the Chehalis Basin. Over 200 years of potential actions to address flood damage have been considered, with no real change, until now. The Chehalis Basin Flood Action Plan is the first in a series of actions that will reduce flood damage and restore the basin.

7/2/2018

Implementing a Comprehensive, Integrated Approach for Fish and Floods. An extensive evaluation of the potential of riparian, technical, financial, and social measures to reduce flood damage and restore aquatic species. The Chehalis Basin Flood Action Plan is the first in a series of actions that will reduce flood damage and restore the basin. The Chehalis Basin Flood Action Plan is the first in a series of actions that will reduce flood damage and restore the basin.

- A concrete flood retention dam on the upper Chehalis River, paired with investments to the Chehalis Central Mainstem Restoration.
- Restoration of over 200 miles of Spring Chinook spawning and rearing habitat, removal of priority fish passage barriers, restoration of riparian habitat, and a comprehensive strategy to address riparian habitat.
- Investments in high-quality, low-impact flood damage reduction projects, with a replicable approach to be used in the basin.
- Local government land use management actions to protect existing floodplain functions, to provide for homes and floodproofing businesses and public structures to provide additional protection for residents and structures that are already located in floodways.

Over the next two years, the Washington State Department of Ecology—in consultation with the Washington State's offices, and other agencies and stakeholders—will set an agenda and set the terms and cost of the recommended package of flood damage reduction and aquatic species restoration actions through implementation of the Chehalis Basin Flood Action Plan (CBFAP). The Washington State Department of Ecology will analyze the potential economic, social, and economic impacts associated with the recommended package of flood damage reduction and aquatic species restoration actions as well as a "no action" alternative for the basin.

There will be several opportunities for public engagement on this programmatic plan:

- October 2018: public meeting and formal public comment period on the draft EIS document
- August 2019: public meeting and formal public comment period on the draft EIS document
- December 2019: public meeting and formal public comment period on the draft EIS document

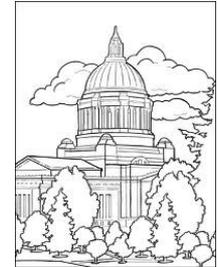

The development of a programmatic plan will be a process that involves agencies, stakeholders, and other interested parties with a formal public participation process to evaluate the interests to meet flood damage reduction and restoration goals in the Basin. The EIS will be developed by the Washington State Department of Ecology in consultation with the Basin's riparian, technical, financial, and social stakeholders to provide a comprehensive strategy to address riparian habitat, and a replicable approach to be used in the basin.

We are happy to answer questions or provide further information about the work in the Chehalis Basin. We can be reached through Facebook at www.facebook.com/wa.ecology or by email at ecology@ecology.wa.gov.

2. Hydraulic Understanding

- **Example: Basin-wide effects analysis**
(Governor's Chehalis Basin Workgroup, 2014 Recommendations Report, 11/25/2014)

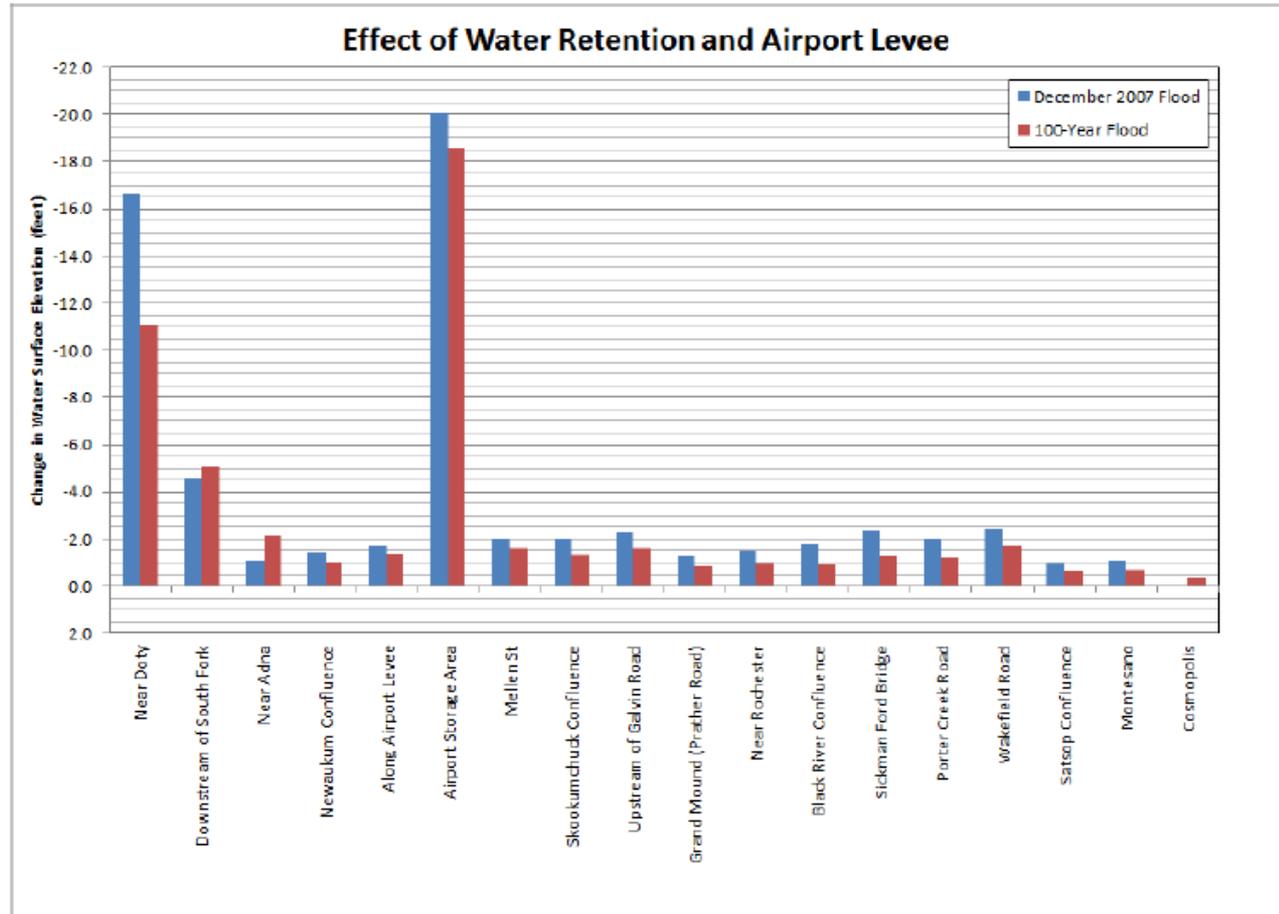

Figure 2: Predicted Changes in Water Surface Elevations from Water Retention and Airport Levee

For 60 years, little has come from efforts to reduce flood damage in the Chehalis Basin. Now, for the first time, there is a broadly-supported, Basin-wide process that is implementing long-sought local projects and leading to a comprehensive strategy to address flooding, while at the same time enhancing aquatic species across the Chehalis Basin.

The 2013 legislature funded a \$26 million program of

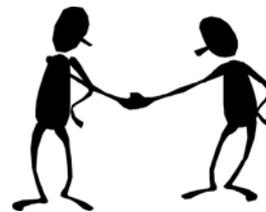

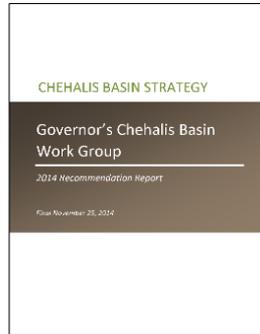

3. Master Strategy (Game Plan)

❑ Evolution (2008 to present):

Flood Authority → Governor's Workgroup → Office of Chehalis Basin.

❑ Key Elements:

1. Evaluation, implementation of Large Capital Projects:
 - Flood Retention Dam on upper Chehalis River.
 - Airport Levee Improvements.
 - North Shore Levee in Aberdeen, Hoquiam.
2. Basin-wide Aquatic Species Restoration (100+ miles spawning/rearing habitat).
3. Local Flood-Damage Reduction Projects.
4. Local Flood-Proofing, including raising homes, CRS actions, local ordinance improvements, etc.
5. Cost = \$500-600M; Benefit = \$720M (100 yrs.); No Action = \$3.5B (100 yrs.).

4. Large Capitol Projects

2013-15:

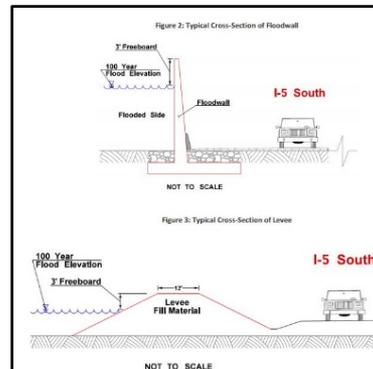

- ❑ Technical team developed baseline knowledge on safety, feasibility of Flood Retention Dam alternatives -- field visits, site and design considerations, world-wide research, etc.
 - Permanent reservoir (w/ fish passage) or Run-of-the-river (no permanent reservoir).
 - Roller compact concrete or Earthen fill.
 - Flood-control only or Multi-purpose.
- ❑ WSDOT evaluated I-5 Protection alternatives -- levees, walls, raise road, etc.

2015-17:

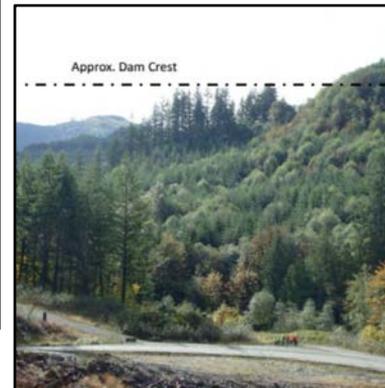

- ❑ Formal environmental review (Programmatic EIS) was conducted to evaluate alternatives.

2017-19:

- ❑ Project-level EIS starts.

- 24 complete
- 15 underway
- \$40.4M State (2012-19)
- \$9.3M Local (2012-19)

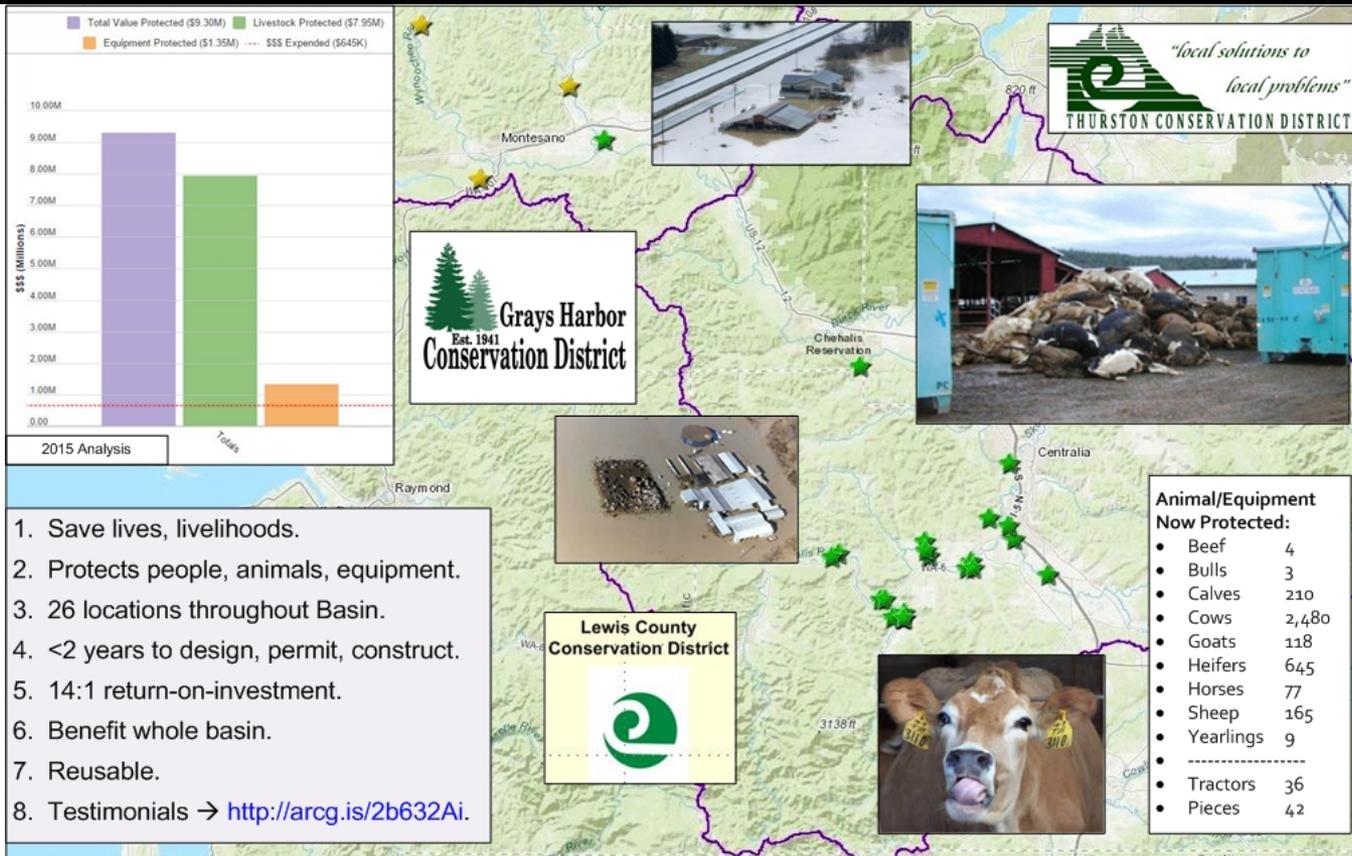

1. ~2-3 years to design, permit, construct.
 2. Protect people, property, infrastructure.
 3. Improve readiness, response, resiliency.
 4. Examples:
 ✓ Drinking Water (Boistfort, Bucoda).
 ✓ Wastewater (Montesano, Pe Ell).
 ✓ Emergency Response (Grays Harbor County, Chehalis-Centralia Airport).
 ✓ Regional Economic Infrastructure (Montesano).
 ✓ Community Protection (Adna, Bucoda, Centralia, Chehalis, Chehalis Tribe, Oakville).
 ✓ Flood Warning Infrastructure (Basin-wide).
 5. Typical cost = \$250K to \$2-3M.

Chehalis River Basin Flood Authority

Chehalis Basin Board Discussion Document

9-27-2018

2019-21 Local Flood Hazard Reduction Project Proposals (ordered, prioritized)

RECOMMEND MOVING FORWARD Tier I -- Continues/Completes Existing Project		FUNDING APPROACH:	
		State Capital Budget Request	To Be Addressed Locally
Project Cost			
1. Aberdeen -- Fry Creek Flood Restoration & Flood Reduction (Phase IIb, New Pump Station)	\$ 3,000,000	\$ 2,499,011	\$ 500,989
2. Centralia -- China Creek Flood and Habitat Mitigation (Phase 2)	\$ 2,500,000	\$ 2,500,000	Notes 1
3. Hoquiam -- Northshore Levee (West Segment)	\$ 800,000	\$ 666,403	\$ 133,597
4. Chehalis -- Flood Storage and Habitat Enhancement Master Plan (Phase II)	\$ 487,991	\$ 406,498	\$ 81,493
5. Grays Harbor County -- Keys Road Flood Protection	\$ 375,000	\$ 200,000	\$ 175,000
6. Port of Chehalis -- Berwick Creek Flood Reduction, Restoration	\$ 500,000	\$ 416,502	\$ 83,498
7. CRBFCZD -- Chehalis River Basin Comprehensive Flood Hazard Management Plan	\$ 275,000	\$ 229,076	\$ 45,924
8. Thurston -- Weather and Stream Flood Hazard Monitoring Telemetry	\$ 49,835	Consider for future funding.	
9. WCSSF -- Chehalis Basin Habitat Work Schedule Documentation and Implementation	\$ 85,464	Consider for future funding.	
	\$ 8,073,290	\$ 6,917,491	\$ 1,020,501

HOLD FOR LATER FUNDING Tier II -- Starts New Project		Project Cost
1. Lewis -- Multi-Jurisdictional Flood Warning and Response Plans	\$	130,000
2. Boistfort Valley Water -- Water System Plan Update	\$	150,000
3. Thurston CD -- Allen Creek Hydrologic Assessment	\$	62,500
4. Lewis -- Unnamed Tributary to Stearns Creek (Pleasant Valley Road MP 4.25) Stream Realignment	\$	846,000
5. Montesano -- South 9th Street Culvert Replacement	\$	140,000
	\$	1,328,500

CONSIDER UNDER CFAR ("Community Flood Assistance and Resilience Program") Tier III -- Home Elevations, Buy-outs, Relocations		Project Cost
1. Thurston -- Elevates or Buy Outs	\$	500,000
2. GH CD -- Wynoochee Home Relocation	\$	104,033
	\$	604,033

Notes: 1 -- Project is looking to reduce overall costs for (1) dirt hauling, and (2) vegetation plantings.	Map --> https://arca.is/PofTv

What's Next – EIS Starts

Fri 9/28/2018 9:00 AM

OB On behalf of Washington Department of Ecology and U.S. Army Corps of Engineers <diane.butorac@ECY.WA.GOV>
Environmental Review Starts for Proposed Chehalis River Basin Flood Damage Reduction Project

To CHEHALISSEPAEIS@LISTSERV.ECOLOGY.WA.GOV

Environmental review starts for Chehalis River project

Public comments sought in first step of environmental assessment process

CHEHALIS – To reduce flood risks in the state's second-largest river system, the Chehalis River Basin Flood Control Zone District is proposing to construct a new **floodwater retention structure** on the Chehalis River near the town of Pe Ell in Lewis County.

The district also is seeking to raise the current levee at the **Chehalis-Centralia Airport**, including elevating part of Airport Road and making other improvements.

Since the proposal is likely to adversely affect the environment, the Washington Department of Ecology and U.S. Army Corps of Engineers (USACE) are seeking public comment to help the agencies define what should be studied in the environmental review for the proposed flood-damage reduction project.

Under the proposal, the Chehalis River would flow normally through the structure except during major floods, when the facility could be operated to hold up to 65,000 acre feet of floodwaters in a temporary reservoir. The water would be released back to the river system as soon as it was safe to do so.

The two agencies are leading separate environmental reviews of the district's proposal but are holding a joint scoping period to make it easier for the public to submit comments. The agencies have established a project website (<http://chehalisbasinstrategy.com/eis/>) with information about the scoping process, public meetings, how to submit comments, and other information about the environmental review process.

Ecology is using the State Environmental Policy Act (<https://ecology.wa.gov/regulations-permits/SEPA-environmental-review>) to evaluate the proposal while the USACE is conducting its environmental review under the National Environmental Policy Act (<https://openel.org/wiki/RAPID/Roadmap/9-FD-k>). Each agency will develop a separate environmental impact statement (EIS) to assess the project.

The first step in the environmental review process is obtaining public input about the scope of the EIS to help identify project alternatives, probable significant adverse impacts, potential mitigation measures, and licenses or other approvals that may be required.

In mid-October, USACE and Ecology will conduct two open house-style public meetings to gather comments:

- **Montesano: Oct. 16, from 5 to 8 p.m. at Montesano City Hall, 112 N. Main St.**
- **Centralia: Oct. 17, from 5 to 8 p.m. at Centralia College, Bowman Rotary Banquet Rooms, 600 Centralia College Boulevard.**

Both agencies will accept public comments through Oct. 29. Comments can be submitted electronically through the project website (<http://chehalisbasinstrategy.com/eis/>) or mailed to:

Chehalis Flood Damage Reduction Project EIS Anchor QEA
720 Olive Way, Suite 1900
Seattle, WA 98101

Each agency will summarize the comments received during scoping into a summary document, and make the summaries available on the project website.

Contacts:
Curt Hart, Ecology communications, 360-407-6944, @ecologyWA Patricia Graesser, USACE communications, 206-764-3750
