

## **Building Cities in the Rain Draft Core Team Agenda**

### What is the end game? Outputs and Outcomes under EPA contract

- Suite of tools and examples for achieving urban densities goals with redevelopment in regional growth centers and meet CWA requirements
- Workshops to get out the information, hopefully in conjunction with grants

### Scope and schedule for next steps (see attached scope)

Do we need to change the scope and deliverables for Building Cities in the Rain? Need new dates.

- Final/Interim Report?
- Materials that lay out different alternatives and examples for meeting growth goals with redevelopment in regional growth centers and meeting CWA requirements that would be useful for other urban centers - In-lieu fee guidance, other permit flexibilities, pilots
- Ecology training
- TA for locals – workshops? Or with Ecology training?
- TA that goes hopefully with grants

### Communication Plan

1. Engaging the environmental community - environmental community concerns relayed through Andy: Is this really cost prohibitive? Is it really a problem? (We answered this mostly with interviews) Share info from background paper.
  - WEC SW initiative – on their web?
  - Futurewise
  - Tribes
  - Puget Soundkeepers
  - PSSRCRight organizations on the list  
What is the best engagement process?
2. Engaging other stakeholder groups:
  - Master Builders
  - REALTORS
  - NAIOP – Commercial realtors
  - Tim's list
  - Others?
3. Engaging stormwater professionals:
  - Andy will go to NPDES permit coordinator meetings, what else should we be doing?
  - American Water Resource Association
  - American Public Works Association
4. Engaging GMPB and other elected officials
  - Timing of future updates to the Board
  - Other opportunities to engage elected officials – AWC conference, web site?

Should we have a core team?

- Planning and strategy
- Determining when to convene subcommittee
- Role of subcommittee v. core team
