

# Regional Field Work Update

Agriculture/Water Quality Advisory Committee  
April 14, 2022

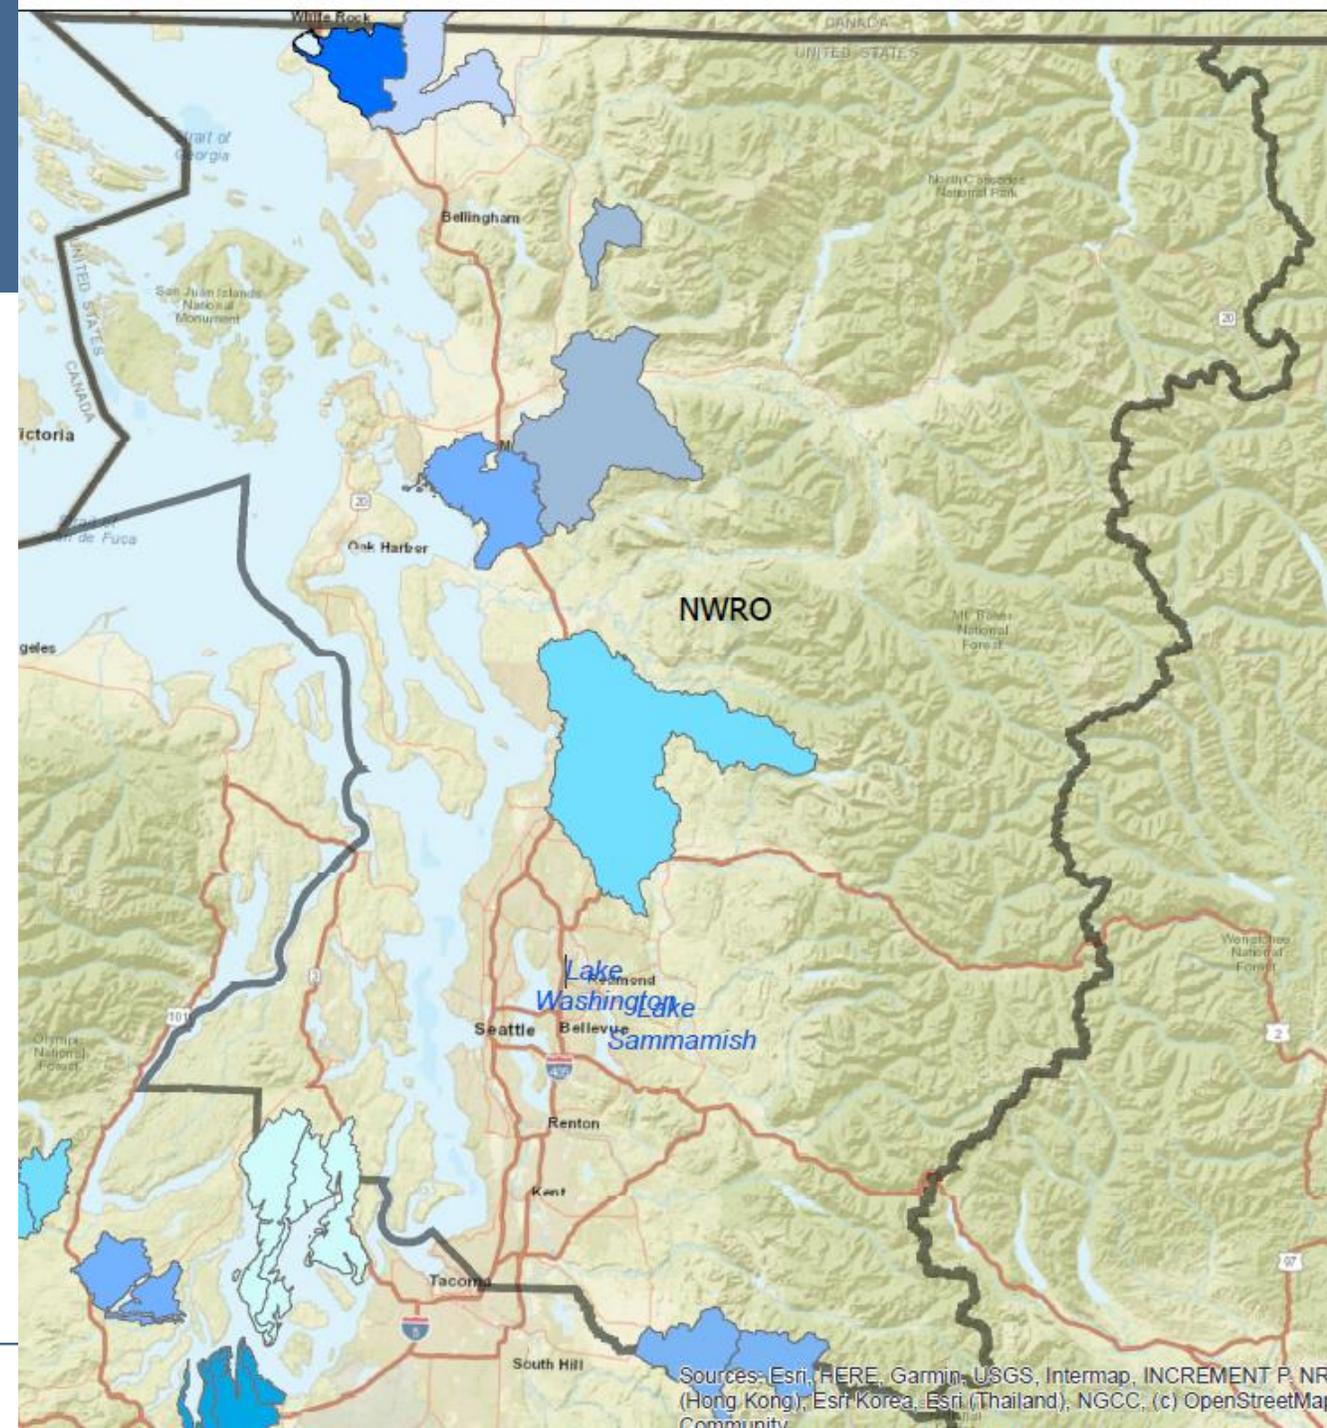

# Ecology's Priority Watersheds

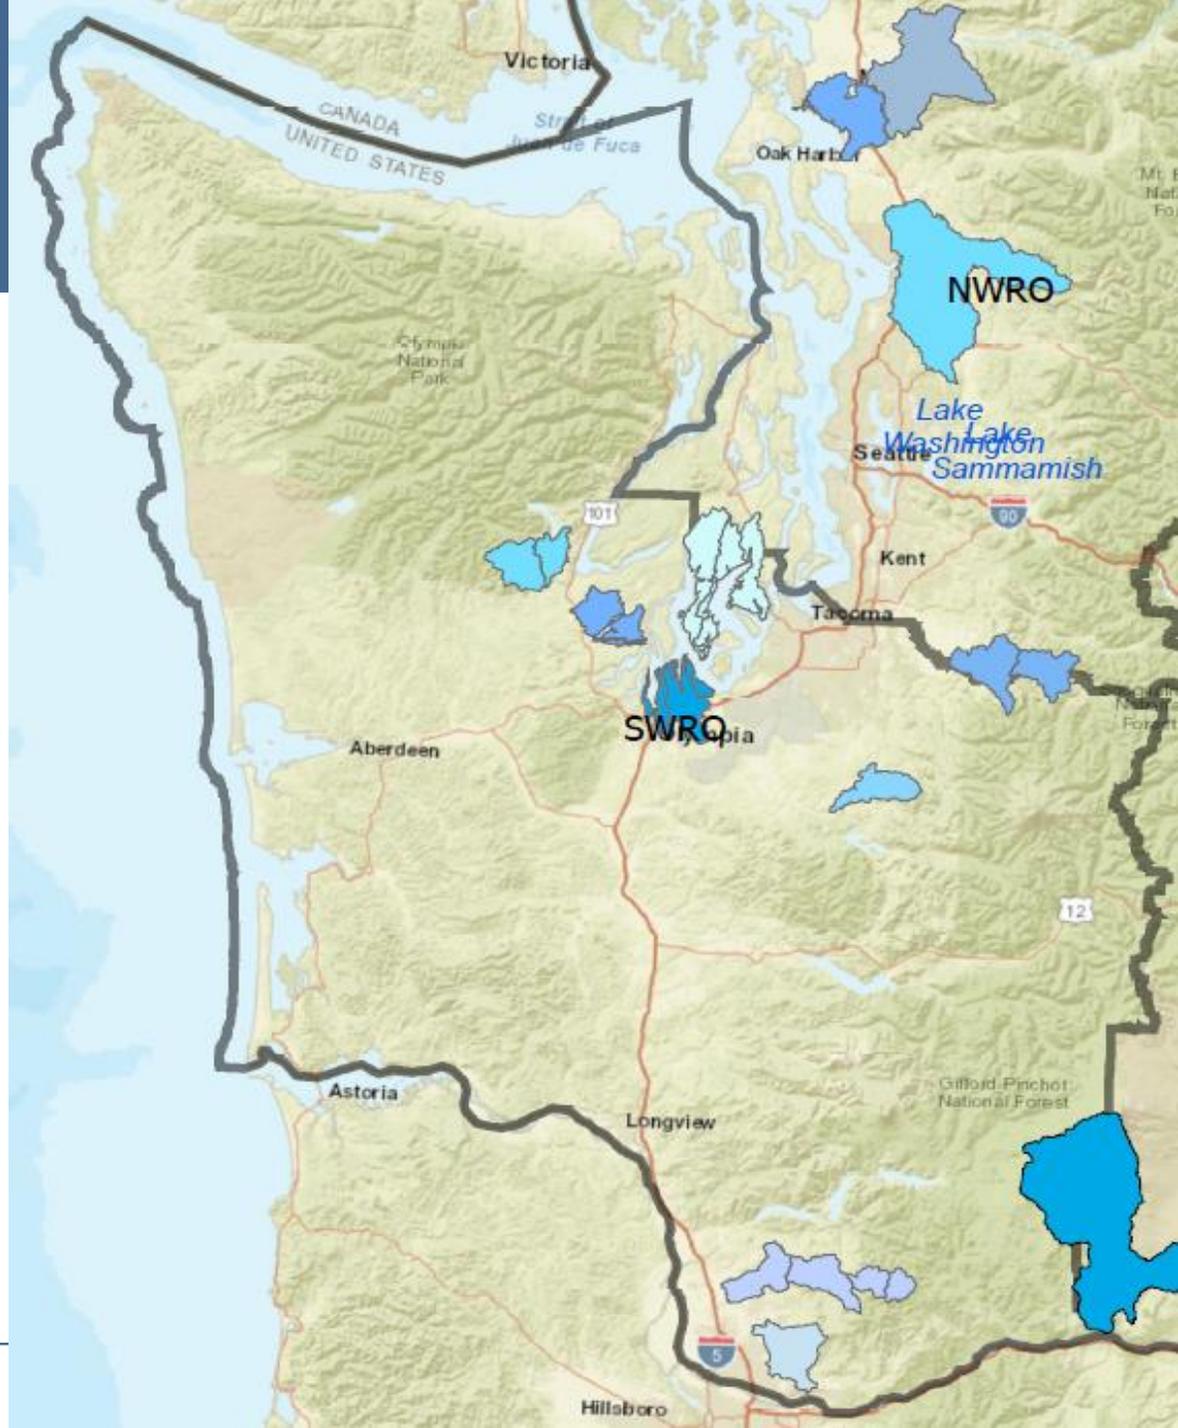

# Northwest

- Lower Skagit Tributaries
  - South Skagit Bay
  - Snohomish Basin
  - Lower Nooksack & Drayton Harbor
  - Samish River – Padilla Bay
- 
- Highlight: Whatcom Lagoons  
Partnered with Whatcom CD to provide \$50k in Terry Husseman grants to help transfer manure from lagoons that were at risk of overtopping to other unused lagoons.

# Southwest

- Enumclaw Plateau
  - East Fork Lewis River
  - Greater Key Peninsula Area
  - Eld Inlet, Henderson Inlet, & Nisqually Reach
  - Oakland Bay & Johns Creek
  - Skokomish Valley & Annas Bay
  - Nisqually River & Ohop Creek
  - Lacamas Creek
- 
- Highlight Enumclaw Plateau  
Building momentum by building partnerships  
and working with landowners to implement  
BMPs.

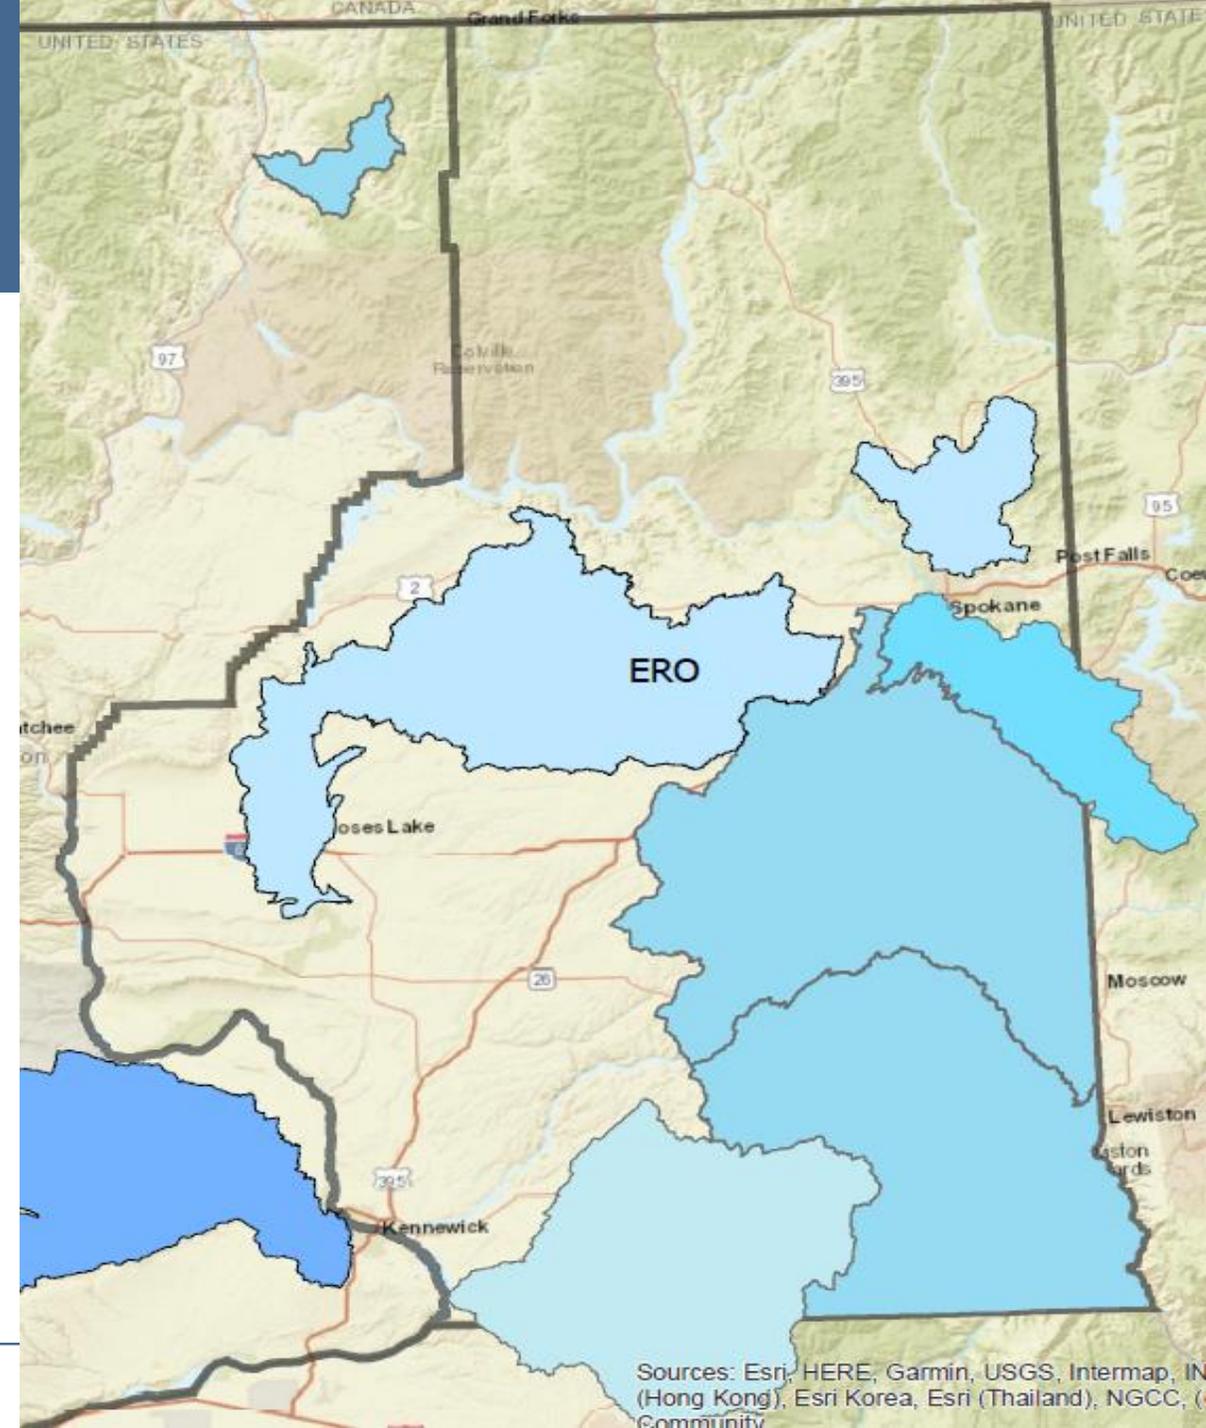

# Central

- Wilson Creek
- Lower Yakima River
- White Salmon River
- Bonaparte Creek
  
- Highlight: Lower Yakima River  
Coordinating with Sunnyside and Roza Irrigation Districts on turbidity and bacteria monitoring during irrigation season. Identifying areas for additional outreach.

# Eastern

- Hangman Creek
  - Little Spokane River
  - Blue Mountain Snake River Tribs
  - Whitman County Snake River Tribs
  - Palouse River
  - Walla Walla River
  - Moses Lake
- 
- Highlight: Hangman Creek  
\$1M for Hangman Creek Riparian Buffer Pilot Project

# CAFO General Permits Reissuance Timeline

Where we're headed next
