

An aerial photograph of a rural landscape. In the center, there is a small farmstead with several buildings and a dirt road. Surrounding the farm are large, green, rectangular fields, likely used for agriculture. A winding river or stream flows through the landscape, particularly on the right side. The background shows more fields and some distant structures. The overall scene is a mix of natural and agricultural elements.

Chehalis Basin Strategy Aquatic Species Restoration Plan (ASRP)

January 9, 2020

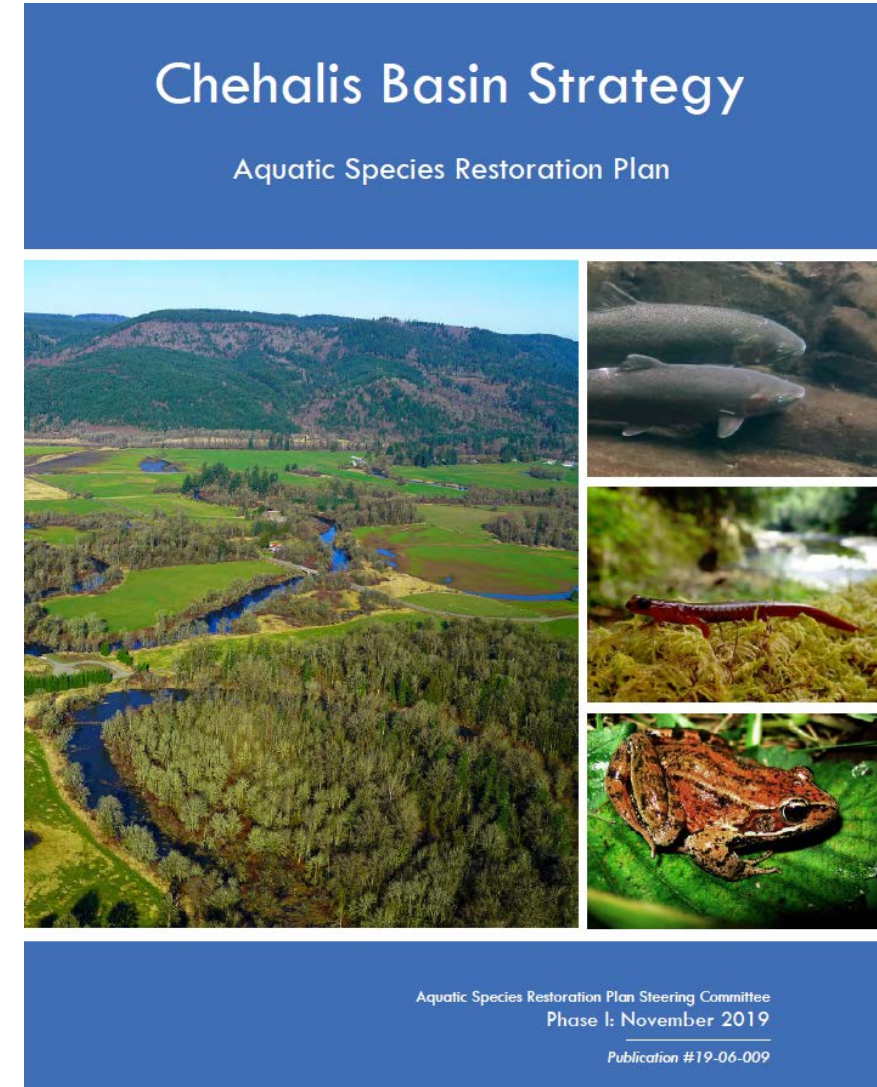

Chehalis Basin Board Meeting

Phase 1 Outreach: Post Publication

- ASRP published November 15, 2019
- ASRP Symposium: January 7-8th
- Public release comment period
 - Ecology published document
 - 2 months in length (mid November 2019 – mid January 2020)
 - Online comment form
