Lower East Fork Lewis R. Restoration Sites. Clark County, Washington

completed project feasibility/design feasibility

Projection: NAD83 WA St.Plane South, feet
Map Created: 7_16_2018_KM

La Center Wetlands Sites 1 and 2

★ Levee breach- 4 locations

● Fish passage improvement - remove culvert and weir

— Channel realignment and riparian improvement
1/2 mile

Floodplain revegetation
45 acres

Site 1- Breach & trail crossing- Greenways

Site 2 - Fish Passage

Site 1- Realign Channel

Both sites - LWD, native species plantings

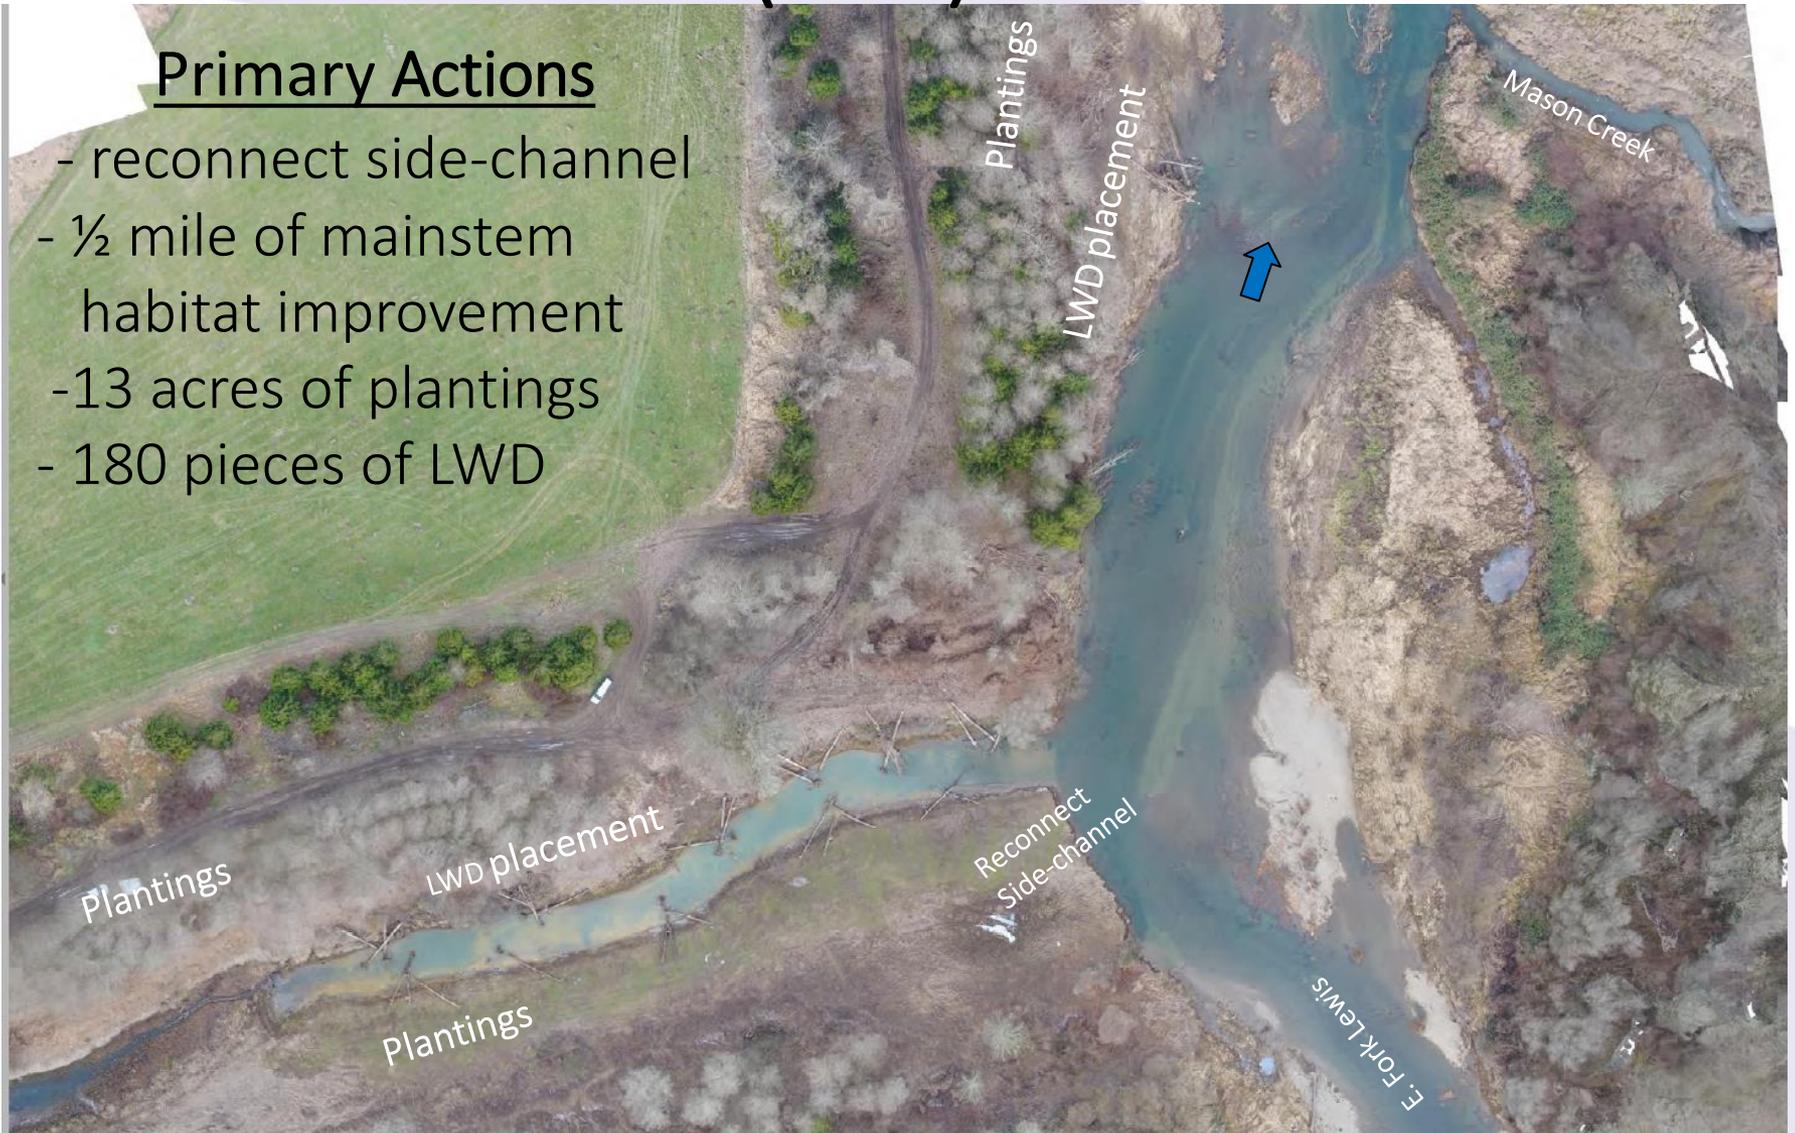

East Fork (Ph 2)- Side Channel

East Fork (Ph 2)- Side Channel

Primary Actions

- reconnect side-channel
- ½ mile of mainstem habitat improvement
- 13 acres of plantings
- 180 pieces of LWD

Side-channel- LWD habitat wood

Plantings- Bare root

Mainstem- Plantings

East Fork (Ph 3)- Ridgefield Pits

- **Limiting factors:** channel confinement, disconnected floodplains, sediment, temperature predation
- **Benefits:** salmonids (adults/juveniles), lamprey, restore native vegetation
- **Proposed Actions:**
 - Site 1- reconnect and improve habitat along 1.5 mi. of the East Fork, including 20 acres at the pits
 - Site 2 - restore connectivity and improve habitat conditions along 2 side-channels (3,500 ft.)
- **Community Based Restoration:** work with partners & Technical Oversight Group

Area 1 Potential Solution: Reconnect East Fork (diff. options) along 3,500 feet + habitat features.

Area 2 Potential Solution: Reconnect side-channels, regrade pit + habitat features.

Upper Ridgefield Pits
