*Snowcaps to Whitecaps ...
with a focus on the watery bits*

PugetSoundPartnership

LEADING PUGET SOUND RECOVERY

Puget Sound Partnership

Lead & Coordinate Recovery of Puget Sound

Dissolved Oxygen
MWQ Index

6 goals:

Water Quality

Water Quantity

Habitat

Species

Human Health

Human Well Being

Puget Sound Partnership

Backbone Organization supporting collective recovery effort

Lead collaborative effort to chart the course to recovery – Vision and Strategy

- Evidence-based
- Clear, transparent, predictable process
- Continuously improving

Support and empower partners to implement priority strategies and actions

- Mobilize funding
- Advance policy and legislative measures
- Educate key partners and Build public will
- Remove barriers

Manage shared measurement and accountability and increase shared learning

- Support development of theories of change (results-based planning)
- Encourage and support use of shared measures
- Encourage and support use of scientifically-robust decision processes
- Build capacity and support for evidence-based decision making
- Support communication of evidence-based work

Implementation Strategies

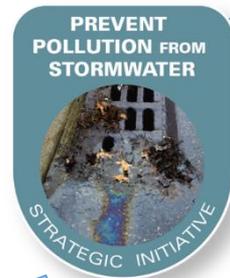

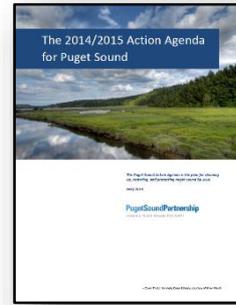

Tools for focusing, integrating and coordinating efforts

Purpose

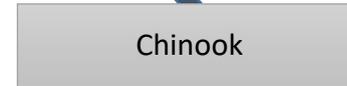

- Identify strategic priorities
Policy, management, funding, outcomes
- Improve management
Align local & regional efforts (programs & actions)
- Identify priority pressures affecting the Vital Sign(s) and key barriers to achieving recovery
- Address key uncertainties impeding recovery: Align & prioritize monitoring, assessment, and research
- Identify intermediate outcomes and measures of progress
- Estimate costs of achieving the recovery target
- Identify who is responsible for all steps of management and implementation

Action Agenda – 4-year priorities
