  - **Coleman Oil, March 18, 2017, r-diesel spill into the Columbia River**
    - **Lower Sleepy Hollow restoration project, Cascade Columbia Fisheries Enhancement Group**
- **Announcements**

# Old Business

Project Proposals

An aerial photograph showing a large pipeline running diagonally across a river. A significant amount of dark, viscous oil has leaked from the pipeline, forming a large, dark, irregular spill that spreads across the river's surface. The surrounding water is a dark, murky brown, and the riverbed is visible with some rocks and sediment. The pipeline itself is a light brown color, possibly made of metal or concrete, and shows signs of wear and rust. The overall scene is one of environmental damage and industrial failure.
