

## PREASSESSMENT SCREENING OIL SPILL REPORT FORM

**ERTS#** 714440

**Date of Incident:** 04/26/2022

**Potential Liable Party:** Spady Transport Ltd

**Product Spilled:** Diesel Low Sulphur (ULSD)

**Spill Source:** Commercial Truck

**Oil Spill Size Estimate:** 150 gallons

**Water Body Affected:** Columbia River

**Ecology Region:** SWRO

**County:** Cowlitz

**Nearest City:** Woodland-Cowlitz

**Location of Spill:** Southbound Interstate 5, Milepost 25.5

**Cause:** Unknown

**Ecology Responder:** Ben Cornell

**Incident Summary:** On Tuesday, April 26, 2022, WSDOT notified Ecology of a semi-truck accident on southbound I-5 near milepost 25.5 north of Woodland, Washington. A passenger car (2009 VW Jetta) lost control during rainy conditions and spun into the path of the Stonewall Logistics, Inc. semi-truck in the center lane. The Stonewall Logistics truck then struck the Spady Transport, Ltd. truck in the right lane. The semi-trucks went off the road and down the embankment. The truck owned by Spady Transport came to a rest on its side in the Columbia River. WSDOT reported a sheen extending 0.5 miles downstream on the Columbia River from the incident site. Ecology coordinated with the WSDOT, Washington State Patrol, and other first responders. Carl's Towing removed the truck cabs and the trailers, and Spady Transport hired US Ecology to deploy containment boom and sorbent materials on the Columbia River. As of May 6, 2022, sheen was still present at the site, containment boom and sorbents are in place, and plastic sheeting still covered an area of contaminated soil on the shore of the Columbia River until soil remediation can take place.
