

## Quarterly Report Form

**Project Lead: Abby Barnes**

**Project No./Name: IAA No. C1900011 - Quantify Stormwater Mitigation Values Associated with Individual Trees**

**Period Ending:**

**June 2021**

**Project Description:**

The purpose of proposed work is to develop a rigorously derived hydrologic dataset that shows how stormwater is captured by existing common native evergreen and deciduous trees, based on the physio-climatic conditions of the Pacific Northwest.

Yes	No	Overall Status
X		Is project on schedule?
X		Are project issues being addressed successfully?

% complete as of this status report?

85%

**Explain all items above checked 'No':**

**Current Activities:**

Maintaining equipment and downloading data, programing equipment, measuring through fall, measuring stemflow, completing equipment replacement procedures, trouble-shooting data, and other tasks directly associated with data collection at the Evergreen and Webster sites.

Initial efforts have been undertaken to determine best data curating and analysis methods.

**Findings:**

Data collection still in process.

**Schedule:** On Schedule

**Issues This Period:**

As of this reporting period, no unseen issues.

**Decisions Needed:** (*What decisions are needed from whom?*) The project team has had discussions to request from the PRO-C additional funding to extend data collection another 2 years. The project team will continue to work SAM staff with the request.
