Washington State Department of Ecology, Olympia, WA

From: Richard W. Sheibley  
Research Hydrologist, Washington Water Science Center, Tacoma, WA

Subject: Site list and update on stage data collection at RSMP sites

Included with this memo is a site list and update on the status of stream stage data collection for the RSMP small streams status and trends monitoring. Under the Joint Funding Agreement (JFA) #15WNWA30026, the U.S. Geological Survey (USGS) contributed federal matching funds to monitor stream stage at a subset of the monthly RSMP water quality monitoring sites. For task 1 of this JFA, the USGS was required to email a final site list to the RSMP coordinator identifying what sites were being monitored for stream stage. This memo satisfies that deliverable.

**Table 1. Information on the location of stage data collection for RSMP small stream sites**

Stream Name	County	RSMP ID	Deploy date	Retrieval date
Tumwater Creek	Clallam	026OUGA	6/10/2015	Still recording
Canyon Creek	Clallam	009OUGA	6/9/2015	Still recording
Gorst Creek	Kitsap	033WUGA	8/12/2015	Still recording

The USGS plans to retrieve these sensors in May 2016.

Under Task 2 of the JFA, the USGS will be providing time series plots of finalized stage data at these sites as well as a table of several flow metrics. According to the JFA, this information will be included as part of the work that the USGS is doing under the data analysis task and detailed under a separate agreement.

Please feel free to contact me at any time with questions about this update or any other project related issues.
