Re: Request for water Quality Certification
   Rock Island Hydroelectric Expansion

   PWR-LR
   PROJECT NO. 943 - WASHINGTON
   PUBLIC UTILITY DISTRICT NO. 1
   OF CHELAN COUNTY, WASHINGTON

Gentlemen:

The application for the subject water quality certification
has been reviewed in accordance with the pertinent rules
and regulations.

This agency certifies that the subject activities will
comply with the applicable provisions of Sections 301,
302, 306, and 307 of the Federal Water Pollution Control
Act, providing the following conditions are met:

1. Any domestic wastes that may be generated
   through expansion of the facility will be
   adequately treated before discharge to ground
   or surface waters.

2. Contaminated cooling waters and other liquid
   wastes that may be generated through operation
   of the expanded facility will be adequately
   treated before discharge to groundwater or
   surface water.
Date: February 20, 1974

Subject: Rock Island Hydroelectric Expansion,          (Public Notice No. 
          Request for Water Quality Certification for C of E Permits)

Applicant: Chelan County Public Utility District No. 1

Type of Project: Construction of second powerhouse at west abutment of
                 existing Rock Island Dam to permit installation of eight
                 additional generating units and raising the pool elevation
                 by approximately six feet.

The application for the subject water quality certification
has been reviewed in accordance with pertinent rules and regulations. This
agency certifies that the subject activities will comply with the applicable
provisions of Sections 301, 302, 306, and 307 of the Federal Water Pollution
Control Act (in providing the following conditions are met):

1. Any domestic wastes that may be generated through expansion of the
   facility will be adequately treated before discharge to ground or
   surface waters.

2. Contaminated cooling waters and other liquid wastes that may be
   generated through operation of the expanded facility will be
   adequately treated before discharge to groundwater or surface water.

3. 

4.
