

**STATE OF WASHINGTON  
WHATCOM COUNTY SUPERIOR COURT**

IN THE MATTER OF THE  
DETERMINATION OF THE RIGHTS  
TO THE USE OF THE SURFACE  
AND GROUND WATERS OF  
WATER RESOURCE INVENTORY  
AREA 1

NO. 24-2-80000-37

DECLARATION OF LEIGH BEDELL

I, LEIGH BEDELL, hereby declare under penalty of perjury of the laws of the State of Washington as follows:

1. I am now, and at all times mentioned, a citizen of the United States and am a resident of the state of Washington, over the age of 18 years, competent to make this declaration, and make this declaration from my own personal knowledge.

2. I am the Adjudications Technical Lead for the State of Washington, Department of Ecology's Water Resources Program, in Lacey, Washington. I have worked for the Water Resources Program for over 17 years. I lead the work of the Adjudications Technical Team, which works with GIS mapping projects, data management, and other efforts that support the Adjudication Section.

3. Since 2021, I have worked to map the area to be adjudicated in the WRIA 1 general adjudication. I led the effort of identifying all water right holders and rural property owners to comply with RCW 90.03.110(1)(a). This work is described as follows:

1 **Map of WRIA 1**

2 4. WRIA 1 is dominated by the Nooksack River system, consisting of three forks  
3 (North, Middle, and South) that run from the Mount Baker area, converge at the river's  
4 mainstem, and enter Bellingham Bay. In addition to the Nooksack drainage, WRIA 1 includes  
5 a large portion of Whatcom County up to its northern border, which is the border of the United  
6 States and Canada. The eastern portion of Whatcom County that is within the Skagit River  
7 watershed is not included. At its southern border, WRIA 1 includes certain areas of Skagit  
8 County that are included in connected river system drainages. It does not include the  
9 southernmost areas of Whatcom County that are not connected to these drainages.

10 5. In WRIA 1, because the WRIA boundaries are topographical (drainage)  
11 boundaries, there are several dozen parcels of land ownership that are bisected by the WRIA 1  
12 boundary. Where ownership of these parcels lie only partially within WRIA 1, we have only  
13 included them if they include diversions or withdrawals of water directly connected to WRIA 1.  
14 The resulting map is the area identified by Ecology for adjudication.

15 6. A true and correct copy of the map of the locality to be adjudicated is attached  
16 as Exhibit A. An illustrative map of WRIA 1 showing subbasins is attached as Exhibit B.

17 **Rural Parcel Owners**

18 7. One of my duties was to assist Ecology in identifying people to be served as part  
19 of the adjudication of WRIA 1. One part of this was identifying "each person or entity owning  
20 real property situated within the area to be adjudicated but outside the boundaries of a city,  
21 town, or special purpose district that provides water to property within its service area."  
22 RCW 90.03.110(1)(a).

23 8. To identify "special purpose districts," I reviewed the Financial Intelligence  
24 Tool (FIT) of the Washington State Auditor's Office. I identified the following city, town, or  
25 special purpose district that provides water to property within its service area:

- 26 1. Birch Bay Water and Sewer District

2. City of Bellingham Water Division
3. City of Blaine
4. City of Everson
5. Columbia Valley Water District
6. City of Ferndale
7. Glacier Water District
8. Lake Whatcom Water & Sewer District
9. Lynden Water Department
10. Nooksack Water Department
11. Point Roberts Water District No. 4
12. Sumas Water Department
13. Whatcom County Water District. No. 2
14. Whatcom County Water District No. 7
15. Whatcom County Water District No. 13

9. After identifying the above city, town, or special purpose district that provides water to properties within its service area, I obtained maps of their service areas from the Washington State Department of Health Water System Plans. I used these maps and corresponding GIS layer to exclude the properties to be served per RCW 90.03.110(1)(a)(i).

10. I conducted an analysis of parcels utilizing queries within ArcGIS Pro. I developed a reference map of WRIA 1 using data from the Whatcom County assessor of property records and the Skagit County assessor of property records. A GIS layer was created by the Office of the Chief Information Officer for both the Whatcom and relevant Skagit County records from a list of all tax paying owners of record of all parcels in WRIA 1 from the year 2023.

11. I created a full list of parcel owners within WRIA 1 using queries in ArcGIS to select all parcels within WRIA 1 and created a GIS layer for the parcel count. To determine the number of parcels outside of service areas, I used GIS queries to locate the parcels within WRIA 1 that fall outside of the service areas of the cities and special purpose districts from paragraph 8. At the conclusion of this process, I had identified property owners that meet the criteria for rural parcel owners per RCW 90.03.110(1)(a).

**Known Persons Claiming Water Rights in WRIA 1**

13. I also created a list of “known persons claiming a right to the water sought to be determined,” to be served by the adjudication to comply with RCW 90.03.110(1)(a)(ii). To do this, my team and I reviewed water rights in the Department of Ecology’s Water Rights Tracking System (WRTS) and their mapped “place of use” boundaries.

14. Water right documents are often historic documents that are not updated upon change of property ownership. This means it takes additional research to find existing landowners as they might not be on the historic documents. To find the current property owners known to have an interest in these water rights, my team and I queried WRTS for all permits, applications, certificates, and RCW 90.14 (pre-code) claims in WRIA 1. To find the “known persons” claiming an interest in these rights, my team reviewed the “place of use” of each of these water right documents. The water right “places of use” are mapped in Ecology’s Geographic Water Information System (GWIS). GWIS manages the spatial and locational features of water rights permits, certificates, and claims using ArcGIS software. GWIS also maps “place of use” polygons and physical device points, such as a well or pump.

15. For each identified “place of use,” we cross-referenced this area with current property owners identified in county records described above in paragraph 11. This gave us a list of all legal property owners within places of use of recorded water rights within WRIA 1.

16. In addition, we included Group A and B water systems in WRIA 1, as provided by the Washington State Department of Health. This list was taken from Department of Health Records as available in Sentry, the public database for drinking water supply systems. This provided us with additional contact information for individuals who may be claiming a water right or using a group water system under a groundwater permit exemption.

17. We then combined the lists of all parcel owners as described in paragraphs 7-12, together with the list of all known claimants of water rights as described in paragraphs 13-16.

1 This resulted in a list of both, as described in RCW 90.03.110(1)(a)(iii). The resulting list  
2 included many duplicate landowners, which we reviewed and removed.

3 18. Attached as Exhibit C is a true and accurate list of all people to be served in this  
4 WRIA 1 general water rights adjudication in compliance with RCW 90.03.110.

5 DATED this 26th day of April 2024 in Lacey, Washington.

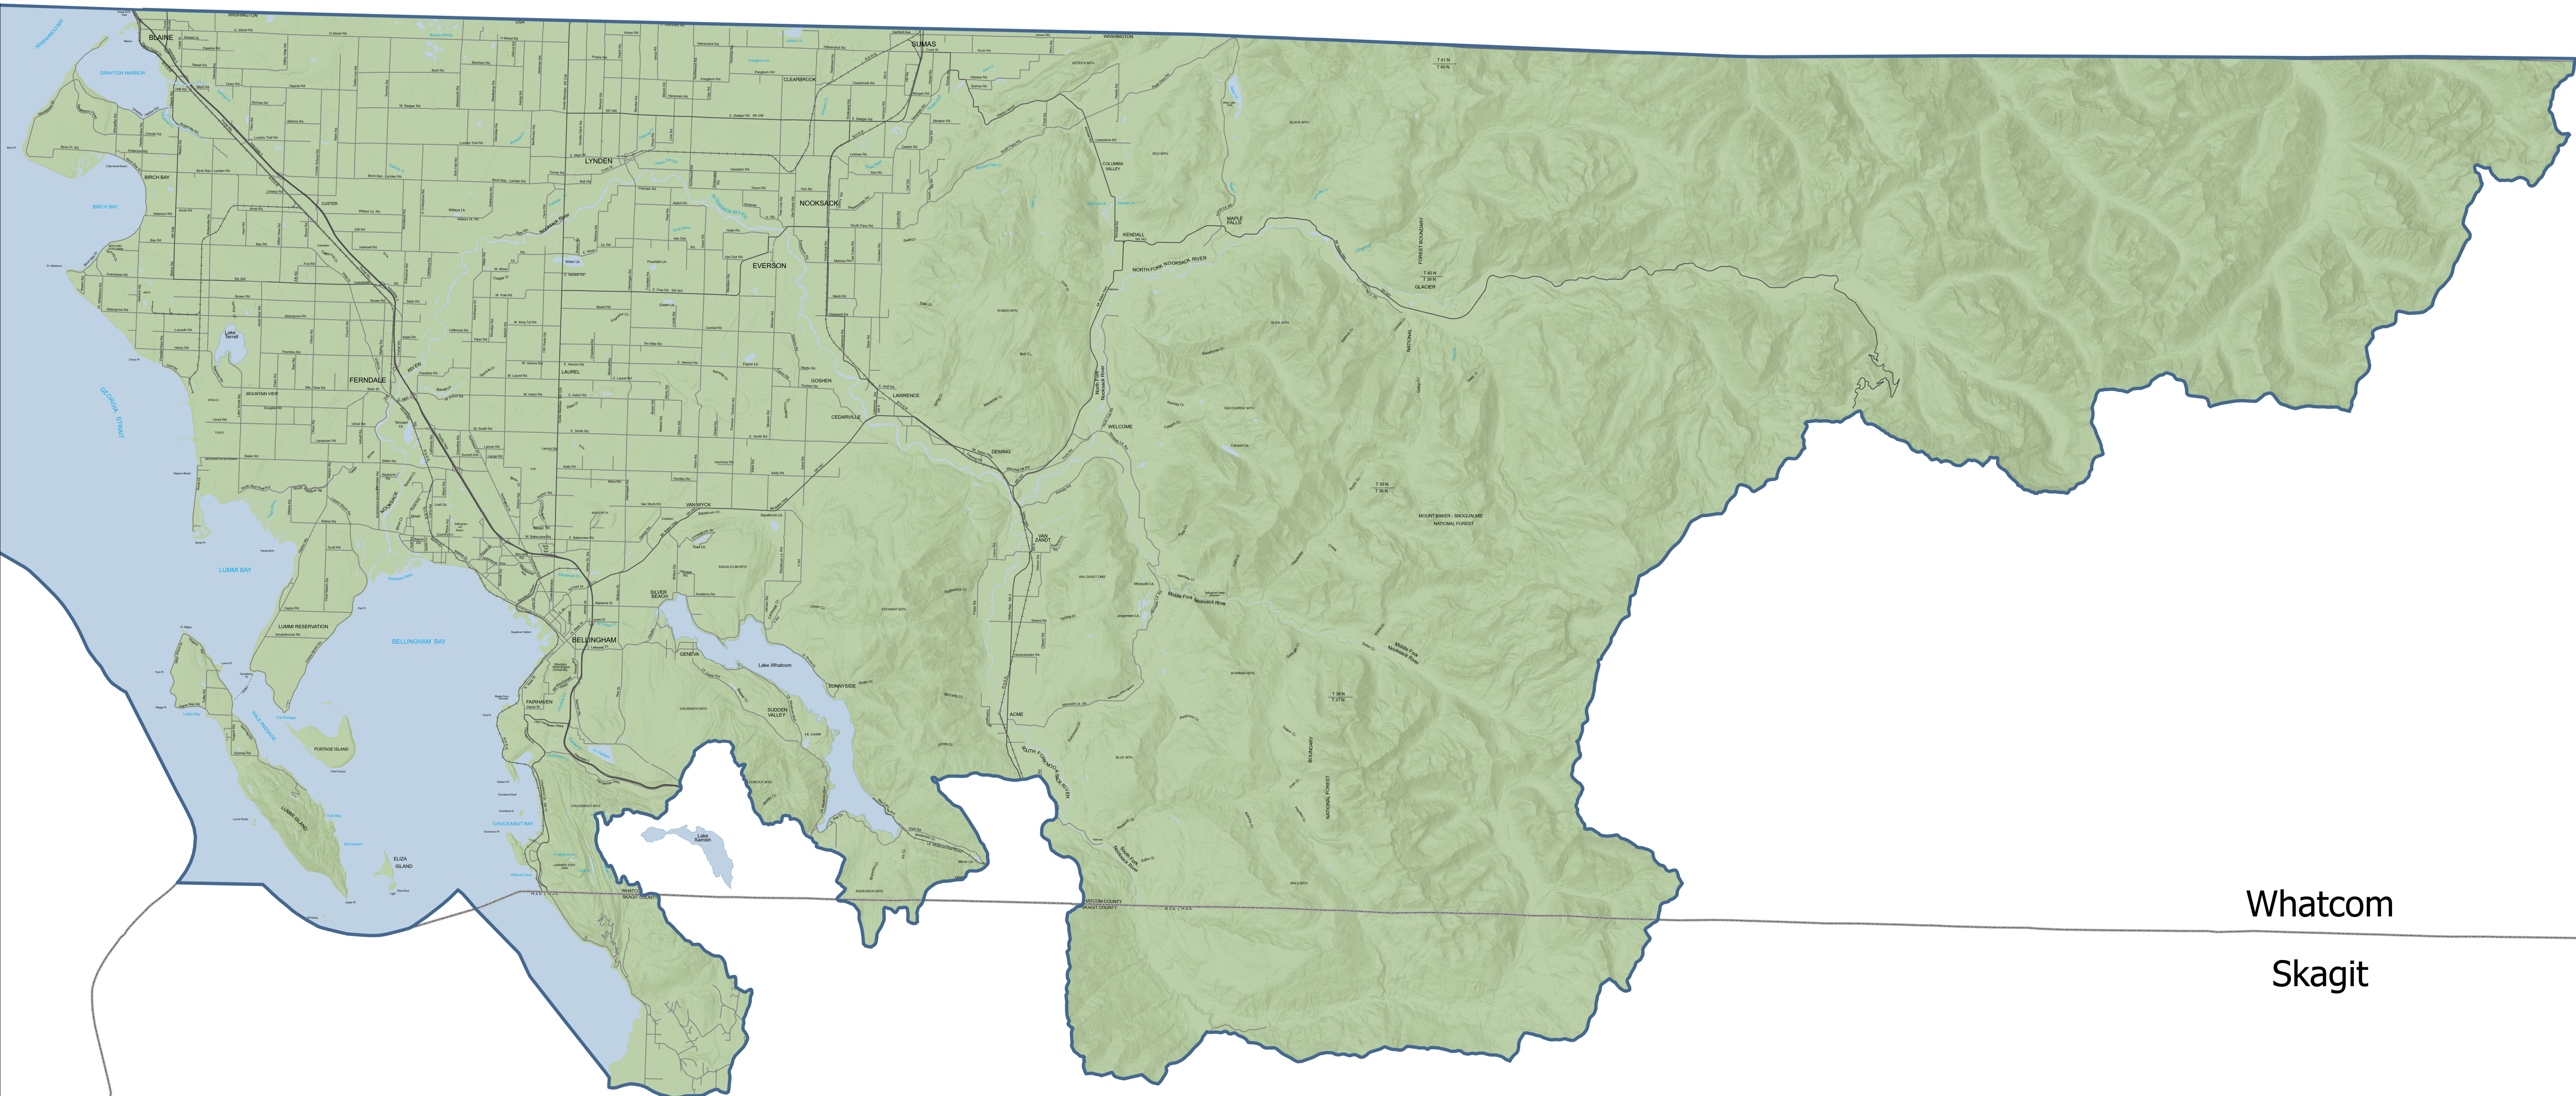

6 Bedell, Leigh  
7 (ECY)
