NARRATIVE DESCRIPTION OF PROJECT:

The project is in the Rattlesnake Hills, about 6 miles Northeast from the town of Sunnyside (see attached map).

This water right, certificated in 1992, is supplemental to the applicant's allocation from the Roza Irrigation District. Therefore, they do not need to provide mitigation for this seasonal change.

The additional point of withdrawal is a previously approved drought well from 2024 and 2005.

The 2024 review of local area hydrogeology suggests that nearby users would not be impaired by the project.
