WATER SOURCE: Naches River	CROP: N/A
INSTANTANEOUS QUANTITY: 6.2 CFS	ANNUAL QUANTITY: 917 Ac-Ft
PERIOD OF USE: The beginning of storage control, as determined by the USBR, through October 15th	
PLACE OF USE: City of Yakima	PURPOSE OF USE: Municipal Supply
IRRIGATION METHOD: N/A	

NARRATIVE DESCRIPTION OF PROJECT:

On March 11, 2024, the City of Yakima submitted an application to temporarily change their POD under Certificate Number S4-84610-J. The City requested and received this same change in POD through *State of Washington, Department of Ecology v. James Acquavella, et al.*, Yakima County Superior Court No. 77-2-01484-5 in 2005 and 2015. Additionally, under Seasonal Change CS4-84610-J, the same change in POD was approved in 2019.

The authorized POD occurs at the Nelson Bridge near Glead, WA, and the City of Yakima has applied to temporarily change that POD to the Naches Water Treatment Plant east of Naches, WA near the Wapatox Canal. The Department of Ecology found there to be 14 points of diversion between the existing and proposed POD but flows were sufficient in the Lower Naches River in 2005, 2015, and 2019 to result in no assertions of impairment. Ecology believes this change will not impair any existing rights.

City of Yakima 2024 Nelson Bridge Seasonal Change
