Additional Information for Roza's Emergency Drought Application for New Suncadia water

Summary: Roza is leasing up to 830 acre-feet of water from the Teanaway and Swauk-First New Suncadia Water Banks. There is a total quantity of 978 ac-ft available in the banks, however there are late season water issues where not all the water will be available. See attached spreadsheet for a list of all certificate numbers and attributes of the water rights in the two banks.

Six of the Teanaway rights are junior to 1883 and will likely be curtailed sometime this summer. The water in First Creek may not be available to take later in the season as well. New Suncadia and Roza Irrigation District will work with Ecology's Water Master for this area to monitor the situation and inform the amount of water available for use by Roza.

Below is the amount of water we believe is available starting with a May 15 storage control date. This does not factor in curtailment or lack of water availability in First Creek.

Offset Quantities based on Storage Control Date		
Month	Days on SC	Ac-Ft Offset
April	0	0
May	16	88.93349839
June	30	181.0061132
July	31	220.9708233
August	31	202.3357523
September	30	117.4273577
October	31	19.965284
Total Offset		830.6388289

This is a downstream move that will keep water in the Teanaway, Swauk and First Creek. There will be no impact to TWSA using the above quantities.

New Point of Diversion: 950 feet, S 3° 30' west (approximately 975 feet south and 75 feet west) from the northeast corner of Section 32, being within the NE1/4NE1/4 of Section 32, T. 15 N., R. 19 E.W.M.

Consumptive Use Calculation: All of the water in the New Suncadia bank is consumptive only.

Period of use: May 15, 2024 – October 15, 2024, or until the water is no longer available.
