

WATER TRANSFER WORKING GROUP PROJECT DESCRIPTION

APPLICATION NO./COURT CLAIM NO. S4-83515-J, S4-83564-J, S4-83505-J, S4-83511-J		
APPLICANT NAME Roza Irrigation District	CONTACT NAME Sage Park	TELEPHONE NO. 509-840-1584
WATER RIGHT HOLDER'S NAME (if different) ERE Holdings, LLC		EMAIL spark@roza.org

DATE OF APPLICATION March 25, 2025	PRIORITY DATE 1871 and 1872
---------------------------------------	--------------------------------

WATER SOURCE: Manastash Creek	CROP: Many different crops are grown within the district, including but not limited to – orchards, blueberries, row crops, hay, triticale, corn, grapes, hops
INSTANTANEOUS QUANTITY: Up to 3.803 cfs	ANNUAL QUANTITY: Up to 1,103.57 ac-ft
PERIOD OF USE: March 1 – October 31 Roza will use the water once pro-rationing and/or storage control starts - October 1 or, until water is not physically available	
PLACE OF USE: Those irrigable lands within the boundaries of the Roza Irrigation District.	PURPOSE OF USE: Irrigation for 72,600 acres
IRRIGATION METHOD: There are multiple irrigation methods on the Roza Irrigation District, including but not limited to, drip, overhead, circle. This water will be conveyed through the Roza Canal System.

NARRATIVE DESCRIPTION OF PROJECT:

Roza Irrigation District is seeking an emergency drought authorization for up to 1,103.57 ac-ft acre-feet of water. The water rights are Class 1 and 2 rights. There are a total of 696.6 acres being irrigated either through rill or pivots. This water is being made available by fallowing 373.5 acres of hay. ERE Holdings created a farm plan documenting the 373.5 acres that are fallow for the 2025 Irrigation Season (March 1 – October 31) out of the 696.6 acres withing the existing Place of Use. Of these 696.6 acres, about 135.6 acres are irrigated by Kittitas Reclamation District and about 44.8 acres are irrigated by Westside. The

transfer does not include any land irrigated by KRD water or Westside water.

Please see the Farm Plan, Farm Plan Map and Consumptive Use Calculations in the “Additional Information for Roza’s Emergency Drought Application for ERE Holdings, LLC.”

This water right does have some late season curtailment potential. In 2015, 43.17 acre-feet of consumptive water was curtailed. Roza Irrigation District will work with Ecology’s Water Master for this area to monitor the situation and inform the amount of water available for use by Roza. Water that is curtailed will not be used by Roza.

This is a downstream move that will keep water in Manastash Creek for the 2025 irrigation season. There will be no impact to TWSA. Roza will use this water throughout the 2025 irrigation season. Roza plans to shut off October 1, 2025, unless there is an October water allocation.
