— Announcement —
Stakeholder Review Sought on Prototype Version

The State of Washington, led by a multi-agency Align Salmon and Water Grants/Loans Workgroup, has released a prototype version of the *Washington Water & Salmon Fund Finder*. This web tool has been developed to help people find, understand, and access water and salmon grant/loan information. The tool is one piece of a larger effort to increase coordination among funding agencies in Washington to benefit people, water, and salmon. The *Washington Water & Salmon Fund Finder* is supported by Results Washington as a Governor Inslee Improvement Project.

Stakeholder Review Site -- https://data.results.wa.gov/stories/s/Washington-Water-Salmon-Fund-Finder/bsre-nhqn
