**SECTION I: Applicant and Project Information**

**GENERAL INFORMATION**

1. No work of any kind may begin in a floodplain until a floodplain development permit is issued.
2. The permit may be revoked if any false statements are made in this application.
3. If revoked, all work must cease until a permit is re-issued.
4. The development may not be used or occupied until a Certificate of Compliance is issued.
5. The permit will expire if no work is commenced within 6 months of the date of issue.
6. The permit will not be issued until any other necessary local, state or federal permits have been obtained.

By signing and submitting this application, the Applicant gives consent to the local Floodplain Administrator or his/her representative to make reasonable inspections prior to the issuance of a Certificate of Compliance.

By signing and submitting this application, the Applicant certifies that all statements contained in SECTION I of the application, and in any additional attachments submitted by the Applicant, are true and accurate.

**OWNER INFORMATION**

**PROJECT INFORMATION (continued)**

### Type of Structure:
- [ ] Residential
- [ ] Garage/Shop
- [ ] Non-Residential
  - [ ] Elevated
  - [ ] Floodproofed
- [ ] Combined Use (Residential and Non-Residential)
- [ ] Manufactured Home

### Type of Structural Activity:
- [ ] New Structure
- [ ] Addition to Existing Structure*
- [ ] Alteration of Existing Structure*
- [ ] Relocation of Existing Structure **
- [ ] Demolition of Existing Structure
- [ ] Replacement of Existing Structure**

* **Substantial Improvement**
If the fair market value of an addition or alteration to a structure equals or exceeds 50% of the value of the structure before the addition or alteration, the entire structure must be treated as a substantially improved structure.

**Substantial Improvement Evaluation:**
- Cost of Improvement (a): $__________________
- Market Value of the Building (b): $____________
- Percent of Value Change (a/b): ________________%

Disclaimer: Substantial Improvement Evaluation must be supported by project cost documentation and approved market evaluation. Attach supporting documentation.

** Relocation or Replacement**
A relocated structure or a structure being replaced must be treated as new construction.

### Other Development Activities
- [ ] Excavation (not related to a structural development)
- [ ] Clearing
- [ ] Placement of Fill Material
- [ ] Grading
- [ ] Mining
- [ ] Drilling
- [ ] Dredging
- [ ] Watercourse alteration
- [ ] Drainage improvement (including culvert work)
- [ ] Individual water or sewer system (not included to a structural development listed above)
- [ ] Roadway or bridge construction
- [ ] Specify other development not listed above: __________________________

### PROPERTY OWNER SIGNATURE

*I certify that to the best of my knowledge the information contained in the application is true and accurate.*

______________________________
Signature of Property Owner:

______________________________
Date:
SECTION II: (To be completed by Floodplain Administrator)

FLOOD INFORMATION

1. The proposed development is located on FIRM map panel: ________________ (number and suffix)
2. Effective date on the FIRM: ________________
3. The proposed development is located in Zone ________________
4. Is the proposed development located within the regulatory floodway: [ ] No [ ] Yes
   (New residential structures, additions, and substantial improvements prohibited; Non-residential: Attach Completed Engineer’s Hydraulic Analysis for a No-Rise Certificate)

Structural Development

For structures, the provisions of the flood ordinance specify that the lowest floor be elevated one foot or more above the base flood elevation (BFE) (Zone AE); one foot above the depth number (Zone AO); or two feet above highest adjacent grade (Zone A).

Base Flood Elevation: ________________  [ ] NGVD 29  [ ] NAVD 88  [ ] Unknown (Zone A)
Base Flood Depth (Zone AO): __________ (feet above highest adjacent grade)

Lowest Floor Elevation for the proposed development is: ________  [ ] NGVD 29  [ ] NAVD 88
[ ] Feet above highest adjacent grade (AO/A)

Source of Base Flood Elevation: [ ] FIRM  [ ] FIS or [ ] other: ____________________________________

The following documents are required:

- An Elevation Certificate (Finished Construction) *
- Site Plan (Showing location of SFHA and development)

The following documents may be required:

- Floodproofing Certificate * – required if floodproofing a non-residential structure
- A No-Rise Certificate * – if any of the proposed non-residential development is in a “regulatory floodway”
- An elevation study showing BFEs on developments/ subdivisions exceeding 50 lots or 5 acres in Zone A

* Certificates require completion by a Professional Land Surveyor or Registered Professional Engineer as indicated.

SECTION III: (To be completed by Floodplain Administrator)

Permit Determination

I have determined that the proposed development: [ ] IS  [ ] IS NOT (non-conformance described in separate document)

in conformance with the local Flood Damage Prevention Ordinance.

The Floodplain Development Permit: [ ] IS  [ ] IS NOT (denials are described in separate document)

issued subject to any conditions attached to and made part of this permit.

Signature of Floodplain Administrator: _______________________________ Date: ___________________

CONDITIONS:

1. All enclosures below the BFE shall have a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area. The bottom of all openings shall be no higher than one foot above grade.
2. All mechanical devices, plumbing, and electrical systems shall be installed above the BFE.
3. An updated Elevation Certificate with the as-built elevations is required upon project completion.
4. Enclosures below the BFE shall be used only for parking, building access, and limited storage.
5. 
6. 
### Administrative

**Final documentation verifying compliance with ordinance**

- [ ] Elevation Certificate attached (Finished Construction)
- As-Built lowest floor elevation: ________  [ ] NGVD 29  [ ] NAVD 88
- [ ] Adequate flood venting
- [ ] Adequate utility elevation and floodproofing

**Notes:**

- ______________________________________________________________________________________
- ______________________________________________________________________________________
- ______________________________________________________________________________________

Work Inspected by: ________________________________________________________________

### Certificate of Compliance

*Certificate of Compliance is issued and the development is found to be in compliance with all applicable ordinances.*

_________________________________________________________________________________

Signature of Floodplain Administrator  Date
Permit # _____________________________
Applicant: ___________________________

PLAN REVIEW CHECKLIST

Flood Hazard Area Application Review
Areas in Zone A or AO (without BFE)

Note: ALL forms of development in the Special Flood Hazard Area require a floodplain development permit. This includes structures of any size, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.

BFE = Base Flood Elevation

## Section 2: Specific Requirements - Residential

### For elevated structures (e.g. finished living space):

- **BFE (Locally determined or calculated, optional):**
  - □ NAVD88 □ NGVD29
- **Depth Number (Zone AO):** [feet]

#### Minimum lowest floor elevation

(BFE +1’ or Depth Number +1’ (Zone AO) or 2’ above highest adjacent grade)

- **Square feet of enclosed area below lowest floor elevation:** [feet]

- **Minimum square inches of flood openings:** [□ N/A – Fill]

At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ max above ground

### Required Documentation:

- □ Elevation Certificate marked “finished construction.”
- □ Section A: Filled out by property owner, surveyor, or floodplain administrator
- □ Venting requirements meet minimum criteria
- □ Section B: Filled out by floodplain administrator
- □ (Section C/D: Not required unless for LOMA or LOMR-F application)
- □ Section E: Completed by property owner or floodplain administrator
- □ Building photographs included

- □ If engineered vents: engineer’s certification verifying opening allowance
- □ Zone AO: Require drainage paths to guide floodwaters around and away from structures

### For wet floodproofed structures (e.g. garages below BFE):

- (must be used for parking, limited storage, or building access only)

- □ Attached garage
- □ Detached garage/shop/shed (Variance may be required. See FEMA Floodplain Management Bulletin P-2140)

- **Square feet of enclosed area:**

- **Minimum square inches of flood openings:**

At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ above ground

### Required Documentation:

- □ Elevation Certificate marked “finished construction.” (Attached garages to be on same EC as home)
- □ Section A: Filled out by property owner, surveyor, or floodplain administrator
- □ Venting requirements meet minimum criteria
- □ Section B: Filled out by floodplain administrator
- □ Section E: Completed by property owner or floodplain administrator
- □ Building photographs included

- □ If engineered vents: engineer’s certification verifying opening allowance
- □ Variance (Large accessory structures; See FEMA Floodplain Management Bulletin P-2140)

- □ Require flood resistant materials below flood protection elevation (BFE+1, Depth No.+1, or HAG+2)
- □ Zone AO: Require drainage paths to guide floodwaters around and away from structures

### For manufactured housing units (In addition to above):

- □ Foundation is reinforced (dry-stack blocks not allowed)
- □ Ground anchors and tie-downs to prevent flotation

### Utilities:
Electrical, mechanical, plumbing, heating/air conditioning components elevated
☐ Septic designed to minimize inflow/discharge under flood conditions
☐ On-site water supply designed to minimize inflow under flood conditions
☐ Above-ground tanks are anchored/elevated
☐ Below-ground tanks are designed to resist flotation

**Section 3: Specific Requirements - Non-Residential**

For elevated structures (e.g. finished commercial or industrial space):

| BFE (Locally determined or calculated, optional): | ☐ NAVD88 ☐ NGVD29 |
| Depth Number (Zone AO): |  |

Minimum lowest floor elevation
(BFE +1’ or Depth Number +1’ (Zone AO) or 2’ above highest adjacent grade)

Square feet of enclosed area below BFE: ☐ N/A – Fill

Minimum square inches of flood openings: ☐ N/A – Fill

At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ max above ground

Required Documentation:
☐ Elevation Certificate marked “finished construction.”
☐ Section A: Filled out by property owner, surveyor, or floodplain administrator
☐ Venting requirements meet minimum criteria
☐ Section B: Filled out by floodplain administrator
☐ Section E: Completed by property owner or floodplain administrator
☐ Building photographs included

☐ Zone AO: Require drainage paths to guide floodwaters around and away from structures

For dry floodproofed structures (non-residential only):

| BFE (Locally determined or calculated, optional): | ☐ NAVD88 ☐ NGVD29 |
| Depth Number (Zone AO): |  |

Minimum floodproofing elevation
(BFE +1’ or Depth Number +1’ (Zone AO) or 2’ above highest adjacent grade)

Required Documentation:
☐ Floodproofing certificate completed by a registered engineer
☐ Elevation Certificate marked “finished construction.”
☐ Section A: Filled out by property owner, surveyor, or floodplain administrator
☐ Section B: Filled out by floodplain administrator
☐ Section E: Completed by property owner or floodplain administrator
☐ Building photographs included

☐ Zone AO: Require drainage paths to guide floodwaters around and away from structures

For wet floodproofed structures (accessory buildings or agricultural structures only):

*Variance may be required. See FEMA Floodplain Management Bulletin P-2140*

☐ Agricultural structure
☐ Small accessory structure (equivalent to one story, two-car garage or smaller)
☐ Other accessory structure

Square feet of enclosed area:
**Minimum square inches of flood openings:**
At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1' above ground

**Required Documentation:**
- ☐ Elevation Certificate marked “finished construction.”
  - ☐ Section A: Filled out by property owner, surveyor, or floodplain administrator
  - ☐ Venting requirements meet minimum criteria
  - ☐ Section B: Filled out by floodplain administrator
  - ☐ Section E: Completed by property owner or floodplain administrator
  - ☐ Building photographs included
- ☐ If engineered vents: engineer’s certification verifying opening allowance
- ☐ Variance, if required by FEMA Floodplain Management Bulletin P-2140
- ☐ Require flood resistant materials below flood protection elevation (BFE+1, Depth No.+1, or HAG+2)
- ☐ Zone AO: Require drainage paths to guide floodwaters around and away from structures

**Utilities:**
- ☐ Electrical, mechanical, plumbing, heating/air conditioning components elevated above BFE and shown on EC
- ☐ Septic designed to minimize inflow/discharge under flood conditions
- ☐ On-site water supply designed to minimize inflow under flood conditions
- ☐ Above-ground tanks are anchored/elevated
- ☐ Below-ground tanks are designed to resist flotation

**Section 4: Permit Approval**

- ☐ Record permit in log of floodplain development permits
- ☐ Make sure that all necessary documents are in the file
- ☐ Issue permit
- ☐ Transfer file to Inspections
# INSPECTION CHECKLIST

## Flood Hazard Area Building Inspection

**Inspection Steps**

### Before site inspection:
- ☐ REVIEW permit file before going in the field.
- ☐ ASK permit reviewer questions to understand requirements.
- ☐ Are other State and federal permits in the file?

### Measure stake out distances from waterway or landmark. Is development in the right place? Is fill correct distance from waterway or landmark?
- ☐ YES, check fill compaction and side slopes.
- ☐ NO, take enforcement action to correct problems.

### Elevation of lowest floor checked during framing or foundation inspection after lowest floor is in place. Elevations checked and acceptable?
- ☐ YES, maintain copy of documentation of final elevations in permanent records.
- ☐ NO, take enforcement action to correct problems.

### Electrical, mechanical, plumbing, heating/air conditioning components elevated?
- ☐ YES.
- ☐ NO, take enforcement action to correct problems.

### For enclosures below BFE (including crawl spaces), check that:
- ☐ Flood damage resistant materials are used
- ☐ Enclosure appears to be limited to crawl space, parking, building access, or limited storage
- ☐ Flood openings no more than 12” above grade
- ☐ Enough flood openings installed (based on net open area provided by the flood openings or certification of engineered openings)
- ☐ Flood openings on at least two separate sides of the structure
- ☐ Flood openings allow automatic entry/exit of floodwater (no human intervention needed)

- ☐ Building does not have enclosures below BFE.
- ☐ For any other unchecked items: take enforcement action to correct problems.

### Other Notes Based on Inspection:

**Final Inspection Completed By:** ________________________________  **Date:** ____________________
FINAL APPROVALS
Flood Hazard Area Development

Ensure that the following information is in the file

<tr>
<td>☐ NO</td>
<td>Return to applicant to revise application and site plan.</td>
</tr>
</tbody>
</table>

**Flood Zone**

- ☐ 100-Year Floodplain
  - Must meet flood resistant requirements in flood damage prevention ordinance

- ☐ Floodway, Residential
  - New structures, substantial improvements, and increase in building footprint prohibited. Verify that project is before continuing review.

- ☐ Floodway, Non-Residential or Accessory Structure
  - Require engineer’s “no-rise” analysis and supporting hydraulic data before continuing review.

- ☐ 500-Year Floodplain
  - Floodplain review not required; flood-resistance encouraged. If critical facility, encourage additional flood resistance per code.

**Additions, Alterations, and Remodels: Is a substantial improvement being proposed or has substantial damage occurred?**

- ☐ NO Continue review.
- ☐ YES or UNSURE
  - Require market value cost estimates for the improvement (or damage) and the structure prior to the improvement (or damage). If the improvement (or damage) is more than 50% of the value of the structure, require the entire structure to be retrofitted for compliance with flood code.

- ☐ Historic Structure
  - Structures listed on a National Register of Historic Places or a State Inventory of Historic Places are exempted from this requirement.

**Is any part of the structure below grade on all sides?**

- ☐ YES ☐ NO

Caution! These are considered “basements”, no matter the depth below grade, and are prohibited unless the provisions of FEMA Technical Bulletin 11 are adopted in your ordinance and followed.

**Has the applicant provided copies of all necessary state and federal permits?**

- ☐ NO Advise applicant which agencies to contact. Require copies for the file.
- ☐ YES Require copies for the file.

**Will a watercourse be altered?**

- ☐ NO Continue review.
- ☐ YES Applicant to provide copies of notices to adjacent communities, federal agencies (e.g. CLOMR application), and the NFIP State Coordinator. Engineer’s analysis required to show flood carrying capacity is maintained; method of maintenance specified.

**Is the project located in a Puget Sound watershed?**

- ☐ NO Continue review.
- ☐ YES A Habitat Assessment may be required. Please refer to FEMA guidance and templates.
Section 2: Specific Requirements - Residential

For elevated structures (e.g., finished living space):

Zone AE, A1-30, or AH

BFE: ______________________ □ NAVD88 □ NGVD29 Vertical Datum
Obtain Base Flood Elevation (BFE) from Flood Insurance Study flood profiles

Minimum lowest floor elevation (BFE + 1’) __________________

Zone AO

Depth Number: ____________________ feet above highest adjacent grade
Obtain Depth Number from Flood Insurance Rate Map

Minimum lowest floor elevation (Depth + 1’) ____________________ Measured above highest adjacent grade

☐ Adequate drainage paths around structures on slopes to guide floodwaters around and away from proposed structures

All Flood Zones

Square feet of enclosed area below BFE: ______________________ or □ N/A - Fill to above BFE

Minimum square inches of flood openings: ______________________ or □ N/A - Fill to above BFE
At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ above ground

Required Documentation:
□ Elevation Certificate marked “finished construction.”
 □ Section A: Filled out by property owner, surveyor, or floodplain administrator
 □ Venting requirements meet minimum criteria
 □ Section B: Filled out by floodplain administrator
 □ Section C/D: Completed and stamped by licensed surveyor
 □ Building photographs included
□ If engineered vents: engineer’s certification verifying opening allowance
□ If AE Zone without floodway: engineer’s analysis showing no more than 1’ cumulative rise in BFE

For wet floodproofed structures (e.g., garages below BFE): (must be used for parking, limited storage, or building access only)

☐ Attached garage
☐ Detached garage/shop/shed (*Variance may be required. See FEMA Floodplain Management Bulletin P-2140)

BFE: ______________________ □ NAVD88 □ NGVD29 Vertical Datum
Obtain from Flood Insurance Study flood profiles

Or Depth Number if Zone AO: _____________

Square feet of enclosed area below BFE: ______________________

Minimum square inches of flood openings:
At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ above ground

Required Documentation:
□ Elevation Certificate marked “finished construction.” (Attached garages to be on same EC as home)
 □ Section A: Filled out by property owner, surveyor, or floodplain administrator
 □ Venting requirements meet minimum criteria
 □ Section B: Filled out by floodplain administrator
 □ Section C/D: Not required for low-cost sheds
Building photographs included
☐ If engineered vents: engineer’s certification verifying opening allowance
☐ Variance (Large accessory structures; See FEMA Floodplain Management Bulletin P-2140)
☐ If AE Zone without floodway: engineer’s analysis showing no more than 1’ cumulative rise in BFE
☐ Require flood resistant materials below flood protection elevation (BFE + 1’)

For manufactured housing units (In addition to above):
☐ Foundation is reinforced (dry-stack blocks NOT allowed)
☐ Ground anchors and tie-downs to prevent flotation

Utilities:
☐ Electrical, mechanical, plumbing, heating/air conditioning components elevated above BFE and shown on EC
☐ Septic designed to minimize inflow/discharge under flood conditions
☐ On-site water supply designed to minimize inflow under flood conditions
☐ Above-ground tanks are anchored/elevated
☐ Below-ground tanks are designed to resist flotation

Section 3: Specific Requirements – Non-Residential

For elevated structures (e.g. finished commercial or industrial space):

Zone AE, A1-30, or AH

BFE: _______________________ ☐ NAVD88 ☐ NGVD29 Vertical Datum
Obtain Base Flood Elevation (BFE) from Flood Insurance Study flood profiles

Minimum lowest floor elevation (BFE + 1’) ______________________

Zone AO

Depth Number: ______________________ feet above highest adjacent grade
Obtain Depth Number from Flood Insurance Rate Map

Minimum lowest floor elevation (Depth + 1’) ______________________ measured above highest adjacent grade
☐ Adequate drainage paths around structures on slopes to guide floodwaters around and away from proposed structures

All Zones:

Square feet of enclosed area below BFE: ______________________ ☐ N/A – Fill to above BFE

Minimum square inches of flood openings: ______________________ ☐ N/A – Fill to above BFE
At least 1 sq. in. of opening per sq. ft. enclosed area; Located on 2 or more walls; 1’ above ground

Required Documentation:
☐ If in floodway: “no-rise” certificate completed by a registered engineer (or CLOMR if rise will occur)
☐ Elevation Certificate marked “finished construction.”
  ☐ Section A: Filled out by property owner, surveyor, or floodplain administrator
  ☐ Venting requirements meet minimum criteria
  ☐ Section B: Filled out by floodplain administrator
  ☐ Section C/D: Completed and stamped by licensed surveyor
  ☐ Building photographs included
☐ If engineered vents: engineer’s certification verifying opening allowance

- ☐ If AE Zone without floodway: engineer’s analysis showing no more than 1’ cumulative rise in BFE
- ☐ Variance, if required by FEMA Floodplain Management Bulletin P-2140

☐ Require flood resistant materials below flood protection elevation (BFE + 1’)

Utilities:
- ☐ Electrical, mechanical, plumbing, heating/air conditioning components elevated above BFE and shown on EC
- ☐ Septic designed to minimize inflow/discharge under flood conditions
- ☐ On-site water supply designed to minimize inflow under flood conditions
Above-ground tanks are anchored/elevated
Below-ground tanks are designed to resist flotation

### Section 4: Floodway Encroachments or Floodplain Alterations

- Floodway encroachment
  - “No-rise” certificate completed by a registered engineer
  - OR:
    - CLOMR documentation if zero rise cannot be met, including required notifications
    - Community Acknowledgement Form
    - LOMR documentation following construction

- Alteration of watercourse or boundaries of SFHA
  - Notification to Department of Ecology and FEMA
  - Demonstration that flood carrying capacity is maintained over time
  - LOMR documentation following construction, if required

- AE Zone without floodway: engineer’s analysis showing no more than 1’ cumulative rise in BFE

### Section 5: Permit Approval

- Record permit in log of floodplain development permits
- Make sure that all necessary documents are in the file
- Issue permit
- Transfer file to Inspections
### INSPECTION CHECKLIST

**Flood Hazard Area Building Inspection**

#### Inspection Steps

**Before site inspection:**

- ☐ REVIEW permit file before going in the field.
- ☐ ASK permit reviewer questions to understand requirements.
- ☐ Are other state and federal permits in the file?

#### Measure stake out distances from waterway or landmark. Is development in the right place? Is fill correct distance from waterway or landmark?

- ☐ YES, check fill compaction and side slopes.
- ☐ NO, take enforcement action to correct problems.

#### Elevation of lowest floor checked during framing or foundation inspection after lowest floor is in place. Elevations checked and acceptable?

- ☐ YES, maintain copy of documentation of final elevations in permanent records.
- ☐ NO, take enforcement action to correct problems.

#### Electrical, mechanical, plumbing, heating/air conditioning components elevated?

- ☐ YES.
- ☐ NO, take enforcement action to correct problems.

**For enclosures below BFE (including crawl spaces), check that:**

- ☐ Flood damage resistant materials are used
- ☐ Enclosure appears to be limited to crawl space, parking, building access, or limited storage
- ☐ Flood openings no more than 12” above grade
- ☐ Enough flood openings installed (based on net open area provided by the flood openings or certification of engineered openings)
- ☐ Flood openings on at least two separate sides of the structure
- ☐ Flood openings allow automatic entry/exit of floodwater (no human intervention needed)

- ☐ Building does not have enclosures below BFE.
- ☐ For any other unchecked items: take enforcement action to correct problems.

#### Other Notes Based on Inspection:

- Final Inspection Completed By: ___________________________ Date: ________________
